How to use this guide (Using HP Colour Printer Sales Guide)

SELECTING PRODUCT INFORMATION

On entering the system, you are presented with a graphical representation of the main product/information areas. Click on any icon to access the information relating to that area. For example, click on the icon for HP Color LaserJet printer to bring up the following menu:

HP Color LaserJet 5 and 5M Printer

- Product Summary And Technical Specifications
- Positioning And Benefits
- Cost-Per-Page Summary
- Product And Accessories

READING PRODUCT INFORMATION

After clicking on the Color LaserJet 5 and 5M icon from the main section of the Welcome screen and choosing "Product Summary", you will see the information contained in the HP Color LaserJet data sheet. You can scroll up and down the information using the scroll bar, or click on the headings "Product Summary And Technical Specifications", "Positioning And Benefits" or "Cost-Per-Page Summary" to move directly to that section. Click on "Main Menu" to return to the welcome screen.

SELECTING A HELP TOPIC (UNDERLINED TEXT)

Click on underlined text to access further information on that topic. To select a Help topic using the mouse, point to any underlined text and click the mouse button when the mouse pointer changes to a hand icon. Alternatively, using the keyboard, press TAB to move to the underlined text and press ENTER.

There are two types of underlined text. Click on a solid underline to quickly "go to" another section of information. Click on a dotted underline to bring up a pop-up box, which will stay visible until you click the mouse button or press any key.

GENERAL POINTS

- Contents** - return to the Welcome screen.
- Back** - return to the previous topic.
- History** - view a list of previous topics and allows you to move rapidly to any one of them.
- File Print** - print any topic.
- Edit Copy** - copy any topic or part of any topic for pasting into another document.
- Exit** - end the program.

The information in this document is subject to change without notice.

Clicking here would take you to the HP LaserJet **Product Summary And Technical Specifications** menu.

Clicking here would take you to the HP LaserJet **Positioning And Benefits** menu.

Clicking here would take you to the HP LaserJet **Cost-Per-Page Summary** menu.

Clicking here would take you to the HP LaserJet **Product And Accessories** menu.

European Customer Support Centre Products and Services

The European Customer Support Centre (ECSC) is a telephone support center for HP CPO products, located in Amsterdam, the Netherlands. The products listed here are supported at the ECSC. Products not listed and products out of warranty are not supported at the ECSC and should be referred to the local Customer Response Center. The ECSC is open during the times listed below, Central European Time. On public holidays the ECSC is staffed to meet local holiday schedules for each language supported. Please see the end of this document for definitions of abbreviations and terms.

Definitions of terms used:

- >** This arrow sign indicates that inquiries regarding repair time should be addressed to the local HP office.
- 1 yr OS; 2 yrs RHP** This abbreviation indicates that during the first year after purchase the product carries an Onsite warranty (see definition below), and during the two following years it carries a Return to HP warranty (see definition below).
- ECSC Support Tel #:** ECSC support tel number refers to the telephone numbers of the ECSC by product and language. Opening hours are included for each group.
- Onsite:** Onsite means that repair is arranged by the local Customer Response Center and carried out by a technician at the customer site. Qualification may be done either at the ECSC or the local Customer Response Center.
- Repair Contact:** Repair Contact indicates the HP office that arranges for the repair, including taking customer information, logging repair requests, and answering questions about repair status.
- Repair Policy:** Repair Policy describes the type of repair used for each product.
- Repair Time:** Repair Time is the approximate time it takes to repair a product. Repair times are estimated and may vary by region. "-->" indicates that inquiries regarding repair for this product should be

addressed to the local HP office.

Return to HP: Return to HP means that the product is returned by the customer to the local HP service center for repair. Qualification may be done either at the ECSC or the local Customer Response Center. Refer to the local service center for turnaround time information.

Std. Warr: Std. Warr. refers to the standard warranty period of the product, as defined by the product division.

Unit Exchange: Unit Exchange indicates that during the first 30 days after purchase, the customer should return the product to the dealer, who will exchange the defective product for a new product. After 30 days the customer should be referred to ECSC for qualification. If the product is defective it will be exchanged at the customer location for a remanufactured unit. Repair is done centrally by Express Support Europe. In some situations the ECSC may propose a Repair and Return service to the customer as an alternative to a Unit Exchange, in this case the product is picked up, repaired centrally and returned to the customer.

HP First Utility: Connected to subcontractors to order drivers and accessories.

HP Colour in the Office - Summary Page

HP DeskJet 1600 C/CM

HP CopyJet/M

HP Color LaserJet 5/5M

19

96

Product Summary

- ◆ Professional black and white and colour printing

- ◆ Convenient colour copying and network printing in one affordable product

- ◆ Breakthrough in colour laser print quality
- ◆ Confident colour printing

Features

- ◆ 600 x 600 dpi black with RET
- ◆ Fast office performance

- ◆ Brilliant colour and crisp text
- ◆ 300 x 300 dpi colour
- ◆ 600 x 300 dpi black and white

- ◆ 1200 dpi equivalent image quality

What Can Colour Do For You?

Colour Is A Solution For Business

Colour has moved from a specialized or niche use to a business solution. Colour is used to improve decision making and selling. Colour aids in readership, and speeds comprehension and learning.

HP Has Removed The Barriers

Colour is not expensive. Colour cost is similar to black, dot for dot. \$0.12 for 40% coverage on LJ5 - cheaper than black and white. PQ is awesome...CLJ5 leads the industry.

HP Has The Industry's Most Complete Office Colour Solution

Personal, workgroup, department printing. Colour scanning.

Get People To Read Your Document

Colour attracts people. And since it attracts us visually *and* emotionally, you can **use colour** to get people to look at what you print. But what's even better? According to studies, **people are 40% more likely to read your document if it's in colour.** That means that people are **more likely to read what you print.**

Get People To Understand Your Point

Studies have shown that using colour can **increase the speed and accuracy** with which people understand your document. Better than that, using **colour can make people remember** your point longer.

Sell Your Ideas Or...

We all need to sell something. In school or at work, we need to sell our ideas. In business, we need to sell products or services. Studies have proven that the simple addition of **colour can increase the persuasive power** of your documents.

How To Make Colour Work For You

Use colour to **help your reader pick out the most important words** in your document. Black can be an effective colour when the rest of a sentence is in a cool colour, like blue or green. **Use colour in text like you would use a colour highlighter pen:** only where you want emphasis.

Product Summary And Technical Specifications

Win business with a winning image – breakthrough colour laser printing...

Number

Standard Unit	Description
C3961A	HP Color LaserJet 5 printer-Includes 20 Mbytes RAM, IEEE 1284 ECP (bi-directional) parallel and MIO port, enhanced HP PCL 5 with colour, four separate toner bottles, toner collection kit, coating kit, imaging units (colour developer, black developer, print drum, transfer belt, fuser), one 250-sheet A4-size paper tray, power cord, drivers and documentation. Printer interface cables not included.
C3962A	HP Color LaserJet 5M printer-Includes 36 Mbytes RAM, IEEE 1284 ECP (bi-directional) parallel port, HP JetDirect Ethernet/LocalTalk print server, enhanced HP PCL 5 with colour, Adobe™ PostScript™ Level 2 , four separate toner bottles, toner collection kit, coating kit, imaging units (colour developer, black developer, print drum, transfer belt, fuser), one 250-sheet A4-size paper tray, power cord, drivers and documentation. Printer interface cables not included.

With the HP Color LaserJet 5/5M printers, users get the best black and colour print quality available in a business printer, to get their message across more memorably.

The HP Color LaserJet 5/5M printers support many users with robust 30,000-page-per-month duty cycles, high-speed 40-MHz RISC processors, high-volume paper-handling options and 2-10 page-per-minute output speed.

HP Color LaserJet 5 and 5M printers use new HP [Image Resolution Enhancement technology 1200](#) (HP Image REt 1200) to produce outstanding text, impactful graphics, and more vibrant colours than before

 millions of solid colours.

Print Quality	HP Color LaserJet 5 and 5M printer output is equivalent to 1200-dpi image print quality. HP Image REt 1200 uses a proprietary toner-on-toner process that varies and blends precise amounts of four process colours (cyan, magenta, yellow and black) to create millions of solid colours. The printer also uses a direct-to-drum imaging system to provide accurate colour placement. This process creates more accurate details, high-resolution text rendering and photorealistic results.
----------------------	--

Speed and

Throughput 10-pages-per-minute (ppm) rated engine speed for black-and-white or single-toner colour documents; 2-3-ppm rated engine speed for colour paper documents; up to 1-ppm rated engine speed for HP Color LaserJet 5 and 5M Glossy Paper and HP Color LaserJet Transparency Film.

Typeface Capabilities 45 built-in scaleable typefaces (35 Intellifont, 10 TrueType).
Additional 35 scaleable typefaces (Adobe Type 1 fonts) available with the HP Color LaserJet 5M printer or with optional [Adobe™ PostScript™ Level 2](#) SIMM.
The HP Color LaserJet 5M and HP Color LaserJet 5 printers are equipped with a PostScript SIMM accept all Type 1 typefaces.
32 internal symbol sets for Intellifont and 27 internal symbol sets for TrueType, plus line printer bitmap.
Accepts downloadable Intellifont and TrueType typefaces.
TrueType rasteriser for Windows PCL printer language and [Adobe™ PostScript™ Level 2](#) software.
HP FontSmart (65 additional TrueType screen fonts).

Memory **HP Color LaserJet 5 printer:**
20 Mbytes standard RAM memory; additional 16 Mbytes required to print in PostScript with optional PostScript SIMM.
Three universal SIMM slots available.
Maximum available capacity including standard memory: 84 Mbytes.

HP Color LaserJet 5M printer:
36 Mbytes standard RAM memory.
Two universal SIMM slots available.
Maximum available capacity including standard memory: 76 Mbytes.

HP Color LaserJet 5 and 5M printers:
HP Memory Enhancement technology (MEt) capability expands the printers' ability to handle complex documents using standard memory and HP [PCL 5](#) with Colour language.
Optional SIMM RAM memory modules: 1-, 2-, 4-, 8-, 16-, and 32-Mbyte (in any combination).

Connectivity HP Color LaserJet 5 printer: IEEE 1284 ECP (bi-directional) parallel and open MIO slot.
HP Color LaserJet 5M printer: IEEE 1284 ECP (bi-directional) parallel, HP [JetDirect](#) network interface print server for Ethernet (10Base-T and 10Base2 [Thin Coax]), and LocalTalk (DIN-8).
HP Color LaserJet 5 and 5M printers: Network operating systems supported with appropriate HP [JetDirect](#) network interface print server inserted into printers' MIO slots:
Novell NetWare (IPX/SPX), IBM LAN Server (LLC/DLC), Microsoft LAN Manager (LLC/DLC), Windows 95 Networking (IPX/SPX), Windows NT (LLC/DLC, TCP/IP), Windows® for Workgroups (LLC/DLC), HP-UX*, SunOS*, Solaris*, SCO UNIX®, IBM AIX** (TCP/IP), AT&T GIS SVR-4**, SG LAN Manager**, Tandem OS**, ICL UNIX**, DEC OSF/2 Ultrix**, SGI**, Apple EtherTalk System 6 and 7, lpd for UNIX and Windows NT.

HP [JetDirect](#) print servers provide support for lpd protocol on TCP/IP for most UNIX-based systems.
Optional HP [JetDirect](#) print server for Token Ring supports all listed network operating systems except AppleTalk.

Optional HP [JetDirect](#) EX Plus3 print server.
Optional HP [JetDirect](#) EX print server.
Automatic network protocol switching allows printer to simultaneously support multiple network operating systems.
HP [JetDirect](#) print servers support SNMP and HP [JetAdmin](#) printer management software.
MIO solutions for mini/mainframe environments and low-cost serial (RS-232/422) interfaces are available from third-party vendors; see the HP Peripherals Connectivity Solutions Guide, p/n 5954-1616EUS, for more information.
* Software support is required. See below for ordering information.
** Software is supported directly from vendors listed.

Printer Languages

HP Color LaserJet 5 printer:

Enhanced HP [PCL 5](#) with Colour; genuine [Adobe™ PostScript™ Level 2](#) software available as an option.

HP Color LaserJet 5M printer:

Enhanced HP [PCL 5](#) with Colour and genuine [Adobe™ PostScript™ Level 2](#) software both standard.

Paper Handling

Standard 250-sheet letter- or A4-size tray (50-sheet input capacity for HP Color LaserJet Transparency Film or HP Color LaserJet 5 and 5M Glossy Paper).
Optional 250-sheet rear feed unit (50-sheet transparency capacity) with single-sheet manual feed.
Output tray holds 100 sheets.
Optional paper trays for letter, executive, and A4 sizes (colour and black-and-white printing); 11" x 17", A3, and legal sizes (black-and-white printing only).

Specifications

Paper Types and Weights

Copier, recycled paper - 75 to 90 g/m².
HP Color LaserJet Transparency Film.
HP Color LaserJet 5 and 5M Glossy Paper.
Does not support printing of envelopes or labels.

Paper Sizes and Printable Surfaces

For colour and black-and-white printing: Letter - 216 x 279 mm (207 x 271 mm printable area). A4 - 210 x 297 mm; (201 x 288 mm printable area). Executive - 184 x 267 mm (175 x 258 mm printable area).
For black-and-white printing only, sizes listed above plus: Legal - 216 x 356 mm (207 x 347 mm printable area).
279 x 432 mm (271 x 423 mm printable area). A3 - 420 x 297 mm (411 x 288 mm; printable area).

Standard Printer Software

HP Color LaserJet 5 printer:

HP PCL and PostScript LaserJet Printing System for Windows 3.1 and 3.11, Windows 95

and Windows for Workgroups  **HEWLETT®
PACKARD** automatic driver installation

program, HP [ColorSmart™](#), HP FontSmart with 65 TrueType screen fonts.
Windows PCL driver supports Windows 95 ICM.
DOS printer drivers-installation program and PCL drivers for WordPerfect®, Lotus® 1-2-3, and Harvard Graphics.

HP ColorSwatch on DOS disk.

OS/2 and Windows NT PCL drivers.

Pantone® certification.

HP [JetAdmin](#) software for Novell® NetWare®, Windows 3.1 and Windows 95.

HP print server NLM for NetWare.

HP Color LaserJet 5M printer:

All of the above software plus:

HP [JetAdmin](#) for IBM OS/2 LAN Server software.

Macintosh printer software: Installer, Adobe QuickDraw PostScript Level 2 driver, HP LaserJet Utility software.

OS/2 PostScript Level 2 driver.

Optional Printer Software

HP [JetAdmin](#) for UNIX software. HP ScanJet Copy utility to make copies using HP ScanJet scanner with HP Color LaserJet 5 and 5M printers.

Printing Process

Four-toner dry-type laser electrophotography. [Direct-to-drum](#) imaging. 300-dpi marking engine with HP [Image REt 1200](#).

Control Panel

Bright vacuum fluorescent display - two 20-character lines.

Messages can be displayed in 11 languages: Danish, Dutch, English, Finnish, French, German, Italian, Norwegian, Portuguese, Spanish, or Swedish.

Operating and Environmental Ranges

Temperature for printer and toner: Operating 10° to 28° C. Storage 0° to 35° C.

Altitude: Operating 0 to 3,100 m. Storage 0 to 4,600 m.

Humidity: Operating 20% to 70% RH. Storage 10% to 80% RH.

Acoustics: Operating/position-LPA 52 dB(A) printing. LPA 35 dB(A) standby.

Sound power-LWAD=6.7 bels (A) printing. LWAD=5.2 bels (A) standby.

Power Requirements

Source: 115 to 127 volts (± 10%). Frequency: 60 Hz (± 3%).

Source: 220 to 240 volts (± 10%). Frequency: 50 Hz (± 3%).

Power consumption: Maximum 1,200 watts. Typical 475 watts (monochrome). Ready 150 watts.

Energy Star powersave mode 45 watts or less.

Dimensions

Width: 620 mm.

Depth: 490 mm. With optional 250-sheet rear feed unit: 625 mm.

Height: 375 mm.

Weight (without toner or options): 46.5 kg.

Product

Certification

UL 1950 listed; CSA 22.2-950 certified; complies with IEC 950/EN 60950, IEC 825/EN 60825, FCC Class B certified CISPR-22 level B, Product CDRH certified Class 1 Laser Product (safe for office/EDP use). NOM IEC 65. Korean Electric Wave Control Law. Novell certified.

Duty Cycle

Up to 30,000 pages per month.

Warranty

One-year on-site warranty on printer and original imaging units. 90-day warranty on replacement imaging units and toner supplies.

HP Color LaserJet 5 standard version has MIO slot for Token Ring or

Support of HP [JetDirect](#) EX MIO.

RESULTS

Output is permanent and water-fast.

Print colour on plain paper for easy to read output.

Prints on HP Color LaserJet 5 and 5M Glossy Paper or HP Color LaserJet

Transparency film.

Add colour easily with "[buttons](#)" in popular software.

Easy-to-use HP ColorSmart software ensures vibrant colour.

Output is print permanent; won't smudge, smear or peel when exposed to

sunlight or water.

Provides the flexibility to handle last-minute changes easily.

Fast print output: even complex documents are completed quickly for greater

productivity.

EASE OF USE

HP [ColorSmart™](#) software analyzes documents and precise images are rendered by automatically analysing incoming data, then applying the right colour and halftone qualities.

Produce documents in-house for flexibility and last-minute changes.

Media flexibility with two input sources and optional paper trays.

Standard 250 sheet input tray; a second input source is available allowing many people to print without the paper running out.

Documents print quickly for greater productivity.

Versatile printing: prints on plain paper as well as other mediums.

COST

Lowest cost-per-page for photo realistic quality in the industry.

Black and white printing comparable to any HP LaserJet output.

needed.

to purchase additional memory.

consumable as needed.

Replace each colour consumable separately, typical life of 3,000 pages or more.

Users will save money and time because outside service bureaus won't be

Printer is equipped with ample memory to print complex documents -- no need

Colour text and graphics print for as little as 5 cents-per-page (U.S).

Separate toner hoppers save users money by letting them replace each

HP Image REt 1200

What Is It? The HP Color LaserJet 5/5M printers incorporate the new HP Image Resolution Enhancement technology 1200 (Image REt 1200). The result is photorealistic 1200-dpi-equivalent image quality, millions of solid colours and office standard HP LaserJet quality text.

How Does It work? HP Image REt 1200 technology, through accurate colour control techniques, lets the printer precisely blend up to four toner colours together--within the space of a single dot--to create a true solid colour. Like an artist mixing paints on a palette to get a desired colour, HP Image REt 1200 ensures precise colour creation by telling the HP Color LaserJet 5/5M printers to "blend" the exact amounts of primary colour toner needed to achieve a required shade.

For example, to print a solid, dark orange dot, HP Image REt 1200 "blends" a small amount of magenta toner with a larger amount of yellow toner and a tiny amount of black toner. If a slightly lighter shade is specified, HP Image REt 1200 precisely adjusts the amounts of magenta, yellow and black toner accordingly.

Older colour printers were forced to create colours by placing them side by side in dithered patterns, and the result is grainy, lower-resolution colour output. The HP Color LaserJet 5/5M printers, with HP Image REt 1200, can place colours on top of each other in precise proportions, and the result is solid, pattern-free colours. With HP Image REt 1200 technology, the HP Color LaserJet 5/5M printers join a new class of colour laser printers that produce smooth, "continuous tone" print quality.

What's The Benefit?

Photorealistic image quality: HP Image REt 1200 creates images that are 1200-dpi-equivalent. Images printed on the HP Color LaserJet 5/5M printers show a high level of detail, and colour transitions are smooth and natural.

Millions of solid colours: Graphics are sharp and crisp. Colors are pattern-free, without the dithered, lower-resolution look of older colour printers.

black or any colour.

Office standard HP LaserJet quality text: Crisp and readable, in

HP ColorSmart

What Is It? Colour Management tools allow users to produce specific colour output quickly and easily. For the average user, colour is made simple through the HP Color LaserJet 5/5M's ColorSmart™ settings. Advanced users can fine-tune colour output with multiple controls, such as ICC and Pantone profiles, and the HP Color Swatch Utility. Each technology provides a different solution to achieve optimal colour printing.

 **HP ColorSmart** technology allows automatic definition of halftone and colour settings by object type: Text, Graphics and Photos. ColorSmart defaults provide high-quality output for most colour printing needs. Users can also turn the defaults off and adjust settings manually for enhanced colour control. This capability is especially useful for documents that include multiple object types.

 **ICC Profiles** are available with the Windows 95 PCL driver, and support for Color Sync 2.0 will be available in Fall 1996. ICC Profiles support ICC-compatible Colour Management Systems. Colour management systems allow users to calibrate colours between monitors, scanners and printers. This technology provides cross-device colour matching and colour consistency between applications.

 The **PANTONE Color Matching System** calibrates computer-generated colour to predefined ink-based colours. This system, traditionally used by graphic artists, is especially useful in matching a company's colours used in logos, product packaging, or company literature.

 The **HP Color Swatch Utility** prints swatches that identify each colour by RGB (Red-Green-Blue) or CMYK (Cyan-Magenta-Yellow-Black) values. This utility is useful for identifying, matching, and generating specific colours.

How Does It Work? **HP ColorSmart** optimizes colour and halftoning automatically by using default settings for Text, Graphic, and Photo object types. The printer recognizes different object types, such as text, vector, graphic, and raster images, and assigns ColorSmart settings accordingly. Users can also turn off the default ColorSmart settings and adjust the colour, halftone, lightness, and saturation output for the different object types.

ColorSmart is enabled through the HP printer drivers and is supported in the following environments: Windows 3.1 (PCL & PostScript), OS/2 (PCL & PostScript), Mac GX and QuickDraw (first half of 1996), Windows 95 PCL and PostScript.

ICC Profiles work with a variety of colour management systems to simplify colour matching between different devices, such as monitors, scanners, and printers.

The **PANTONE Color Matching System** is also enabled through an HP Color LaserJet 5/5M profile. PANTONE profiles are accessed directly from applications, such as CorelDraw!, Adobe Illustrator, Micrografx Picture Publisher, and Adobe Photoshop. HP Color LaserJet 5/5M Pantone profiles will be available through fulfillment at product introduction. The Pantone setting in the HP Color LaserJet 5/5M printer drivers must be selected in conjunction with the PANTONE profiles.

The **Color Swatch Utility** prints up to eight pages of example colours and their accompanying RGB or CMYK values. By typing a simple DOS command, users can specify the colour type and the pages desired. With these pages, users can identify specific colour swatches they'd like to match, and generate that colour by defining the appropriate values within applications. The Color Swatch Utility is included on the printer's DOS driver diskette.

What's The Benefit? The HP Color LaserJet 5/5M provides users with a versatile set of colour management tools to generate their desired colour output.

 **Simple, automatic colour plus unmatched colour control** using ColorSmart defaults and manual colour settings.

Cross-device colour matching through ICC Profiles.

Specific colour matching through Pantone profiles and the HP Color Swatch Utility.

Adobe PostScript Level 2

What Is It? PostScript is a programming language called a Page Description Language (PDL). PDLs arrange text, graphics and images on an area equivalent to a printed page prior to printing by a raster image device. PostScript, like HP's PCL page description language, gives users comprehensive control over the appearance of the printed page. Adobe Systems Inc. developed Adobe PostScript.

Adobe PostScript is a proprietary page description language owned solely by Adobe and licensed to HP. HP's relationship with Adobe started in 1988 when HP began shipping PostScript for the HP LaserJet III printer. The solution was co-developed by HP and Adobe. Since that time, HP and Adobe have worked together to provide PostScript solutions on HP LaserJets, DeskJets, PaintJets and DesignJets.

Other manufacturers have PostScript implementations -- "clones". These clones allow their printers to receive and process PostScript commands. But "true" Adobe PostScript printers, such as the HP LaserJet 5M, actually use Adobe's code. Actually using Adobe's code assures 100% compatibility in PostScript printing. The HP LaserJet 5M is in compliance with the Adobe PostScript standard. Adobe is the "original" PostScript and claims the best quality and the best performance versus the PostScript clones.

How Does It Work? The HP LaserJet 5M receives a description of the page to be printed -- including lines, shapes, fonts, and colours -- and formats that information on a specialized processor built into the PostScript SIMM. The processor then converts that information into dots on the page and sends it to the printer to be printed.

What's The Benefit? The benefits of PostScript are:

The exact same file can print on more than one PostScript device.

This is known in the industry as device independence.

printer on a network.

Mixed host environments (i.e. Windows/DOS, MAC) can share the PostScript

Provides consistent colour across PostScript Level 2 devices.

You should purchase the PostScript option if:

1. You are using a software program that works best if output on a PostScript printer (example: Adobe Illustrator)
2. You want the exact same print file to print on more than one device. Graphic artists often need to do this when they print a file on a local printer (this is called "proofing") before sending the file to a typesetter for final printing.
3. You plan to connect one or more Macintosh computers. PostScript is required for the Macintosh to print on the HP LaserJet 5 printer.

If you still are not sure you need PostScript, the HP LaserJet 5 printer allows you the flexibility of purchasing it later when the need becomes apparent.

HP JetPrint for Novell NetWare

What Is It?	HP's most advanced network printer management capabilities are integrated into the latest release of the HP JetPrint Utility for NetWare. This version boasts all the functionality of the previous version plus additional benefits provided for the HP Color LaserJet 5M printers with the HP JetDirect networking card installed (J2552A).
How Does It Work?	HP JetPrint works with Windows 3.X, Windows for Workgroups 3.X, Windows NT, and Win-OS/2. Users have easy access to all assigned printers on the NetWare network. Automatic installation of the HP Windows printer driver plus printer and print job status enhance the user's network printer experience.
What's The Benefit?	<p>New icons... HP JetPrint will automatically associate an icon depicting the HP LaserJet 5/5M printers on the network. The user is presented an easy-to-recognize icon instead of a long queue name.</p> <p>General usability and performance enhancements... HP JetPrint supports <i>Always-on-top</i> and features an enhanced user interface.</p> <p>Network printer ease of use... Easy selection of network printers, drag-and-drop printing, and printer and print job status information such as job complete, out of paper, etc.</p> <p>Favorite Printers... Users have the ability to create their own list of favorite printers, eliminating the need to browse through all accessible network printers.</p> <p>Automatic driver install and updates... HP JetPrint automatically provides access to the newest or latest version printer driver over the network.</p> <p>Advanced printer status... HP JetPrint provides real-time printer status through a Management Information Base (MIB). For example, when a print cartridge runs out of ink, HP JetPrint reports the condition to the user, identifying which ink cartridge needs replacement.</p>

HP JetDirect Network Card

What Is It? The HP JetDirect Card for Ethernet/802.3, 10Base-T, and 10Base2 networks (HP model number J2552A) is a network interface card that is inserted into the HP Color LaserJet 5 printer to provide a direct network interface. The card supports multiple network operating systems (NOS) including Novell NetWare, Microsoft LAN Manager, OS/2 LAN Server, Windows NT, Windows for Workgroups, Apple EtherTalk, Apple LocalTalk, HP-UX, SunOS, Solaris, SCO UNIX and IBM AIX. The card comes pre-installed in the HP Color LaserJet 5M PostScript printer, or may be purchased separately and installed in the HP Color LaserJet 5 base model printer.

The card allows you to attach a printer directly to your network at any location while providing increased ease of use, network management, and printer I/O performance. Advanced printer and job management are provided through a Management Information Base (MIB) which is supported through the industry standard Simple Network Management Protocol (SNMP).

The J2552A HP JetDirect network card is included with the HP Color LaserJet 5M PostScript bundle. Purchasers of the HP Color LaserJet 5 (base model) can purchase the card separately.

How Does It Work? The HP JetDirect network card conforms to HP's MIO version 6.0 specification. It has an onboard processor dedicated to handling network printing and contains the hardware necessary to connect directly into the network wiring. It plugs into the back of DeskJet 1600C printer and functions similarly to -- although much more efficiently than -- a dedicated PC print server.

What's The Benefit?

Flexible location...
The ability to place the printer anywhere on the network eliminates the need to attach the printer directly to a server or workstation.

Enhanced printer status and diagnostics...
Provides users and administrators status feedback and control of the printer over the network using HP JetPrint and HP JetAdmin network printer utilities.

Automatic Protocol Switching...
Automatically detects the network protocol of a print job and switches to that protocol.

Improved Network Management...
Supports SNMP that allows remote management and troubleshooting of the printer.

HP PCL 5

What Is It? The HP Color LaserJet 5/5M Windows Printing System is a collection of software designed to deliver great Windows colour printing. The software includes a ColorSmart™ (PCL and PostScript) Printer Driver for Windows 3.1 and 3.11, Windows for Workgroups 3.11, and Windows 95; HP FontSmart; HP JetAdmin for 3.1/NetWare; HP JetAdmin for Windows 95/NetWare; and an installer for easy installation of the system. The PCL Windows Printing System ships with the HP Color LaserJet 5/5M printers.

How Does It Work? With the Windows Printing System, users install the Windows printer driver and HP FontSmart on their computers. The driver allows Windows applications to communicate with the HP Color LaserJet 5/5M printers. A printer driver, the software that converts application output data into instructions for the printer, is accessible through the Windows Program Manager/Control Panel or through Windows applications. The Windows driver that is included with the HP Color LaserJet 5/5M Windows Printing System integrates HP ColorSmart, HP's unique colour management technology.

HP ColorSmart is a set of defaults that automatically apply to your colour output for different object types--Text, Graphics and Photos. This capability is especially useful for documents that include multiple object types. ColorSmart defaults provide high quality output for many colour printing needs. Users can turn the defaults off for enhanced colour control and adjust settings manually.

The Windows Printing System also includes HP FontSmart, a font management program for most fonts available in Windows. Users can create, delete, and manage True Type fonts as well as Adobe PostScript Type 1 fonts. FontSmart includes a collection of 110 screen and printer fonts. FontSmart saves disk space by storing fonts in a compressed format until they are installed and ready to use.

HP JetAdmin for 3.1/NetWare and HP JetAdmin for Windows 95 are also included in the Windows Printing System. More information on this software can be found in "Connectivity Solutions" Notables.

What's The Benefit?

Ease of Use--The installer guides users through the installation of all important software components. The printer driver and FontSmart have detailed on-line and context sensitive help. ColorSmart makes colour printing as easy as black and white printing.

Great Colour Documents--ColorSmart allows easy, high quality colour document creation. Manual settings allow for maximum colour and print quality control. Great variety of Windows fonts.

Flexibility--Users can choose among PCL or PostScript, manual or automatic driver settings, and font compression to store unused fonts.

Great Windows printing--All the elements needed for fast, high-quality Windows printing.

HP Color Tools Disk

The one-button Tool Bar icon is available for the following applications:

	HEWLETT [®] PACKARD	Microsoft Word for Windows 2.0, 6.0, and 7.0
	HEWLETT [®] PACKARD	WordPerfect for Windows 6.1

The Colour Palettes are available for the following applications:

	HEWLETT [®] PACKARD	Microsoft Word for Windows 2.0, 6.0, and 7.0
	HEWLETT [®] PACKARD	WordPerfect for Windows 6.1
	HEWLETT [®] PACKARD	Lotus 123 for Windows 5.0 and greater
	HEWLETT [®] PACKARD	Microsoft Excel 5.0 and 7.0
	HEWLETT [®] PACKARD	Lotus Freelance 2.0 and 2.1
	HEWLETT [®] PACKARD	CorelDraw! 4.0 and 5.0
	HEWLETT [®] PACKARD	Microsoft PowerPoint 4.0 and 7.0

What Is It? The HP Color Tools Disk contains tools that help make colour easy to use with Windows 3.1 and Windows 95. The disk, which is available from Centric and electronic distribution bulletin boards (such as CompuServe), contains two tools:

 **HEWLETT[®]
PACKARD Tool bar colour icon**, which eliminates steps to get to an application's colour settings.

 **HEWLETT[®]
PACKARD Colour palette files** that allow the user to print the application's default colour palettes, which takes the guess-work out of screen matching.

How Does It Work? The HP Color Tools program group installs easily through the Windows Program Manager. Simply select the applications desired to install the one-button tool bar icon. The button remains on the tool bar and easy access to colour is available every time the application is opened.

During the install process, users also select the applications in which they would like to preview colour settings. The HP Color Tools program group stores files until the user is ready for them. To open the colour palettes file, the user selects the application from the HP Color Tools program group. With the colour palette file, users can print an output of the application's default colours and see how they look *before* they create a document.

What's The Benefit? HP Color Tools software makes it easy for users to access their application's colour settings quickly and use them with the HP Color LaserJet 5/5M printers. The tool bar colour icon eliminates numerous steps and searching for colour settings. The colour palette files allow users to print an application's colour palette(s), and eliminate the trial and error approach that is often involved with matching screen colours.

HP Direct-To-Drum Imaging

What Is It? The HP Color LaserJet 5/5M printers use Direct-to-Drum imaging, which improves colour print registration for sharper, clearer documents. The printers use an electro-photographic process to create colours using Cyan, Magenta, Yellow, and Black toners. The printer develops all toners directly on the print drum and then transfers the complete image to paper in a single pass. With other printers that have registration problems, colours may not line up correctly and the result is output that looks like badly printed Sunday comics. The HP Color LaserJet 5/5M printers, with direct-to-drum imaging, print with perfect registration every time.

How Does It Work? Some colour laser printers use multiple steps to transfer colour to paper, which can cause registration and sharpness problems. The HP Color LaserJet 5/5M printers, on the other hand, use laser technology, direct-to-drum imaging and the Cyan, Magenta, Yellow, and Black (CMYK) process to provide high-quality, fast colour output that is sharp and clear.

The HP Color LaserJet 5/5M printers charge and expose the drum using the laser scanner, like other HP LaserJet family printers. Then, with direct-to-drum imaging, the HP Color LaserJet 5/5M printers develop all four colours onto the drum.

The process starts by developing the image on the drum for Yellow. The drum is then recharged, exposed and developed for Magenta. The same process is repeated for Cyan and then Black. After completing the direct-to-drum imaging for all four toner colours, the entire image is transferred to paper in one step.

The HP Color LaserJet 5/5M printers use the CMYK process to create high definition colour two ways:

 **HEWLETT[®] PACKARD** Printing Cyan, Magenta, Yellow, or Black as stand-alone colours.

 **HEWLETT[®] PACKARD** Printing using HP Image REt 1200, an exclusive HP technology, to obtain millions of solid colours. The new technology layers toner on toner, using various amounts of Cyan, Magenta, Yellow, and Black toner. For solid black, Black toner is used.

The final step is toner fusing. The HP Color LaserJet 5/5M printers fuse toner in one of two ways:

 **HEWLETT[®] PACKARD** Plain paper fusing, resulting in an easy-to-read matte finish.

 **HEWLETT[®] PACKARD** Special fusing, for HP Color LaserJet 5/5M glossy paper and transparencies. This method creates glossy finish on glossy paper and optimizes projection quality on transparencies.

What's The Benefit? HP Color LaserJet 5/5M printers are ideal for office use because they make business documents more persuasive, concise, and eye-catching to help users close the deal, win the bid, and get new clients.

 **HEWLETT[®] PACKARD** **Sharp, vivid images, graphics, and text**--Direct-to-drum imaging and toner-on-toner technology provide exceptional colour registration and control. The results are images, graphics, and text with perfect registration--no overlapping or misaligned colours.

Reliability--Proven HP LaserJet printer process technology.

A new standard in office printing for the workgroup...

Number

Standard Unit	Description
C3540A	HP DeskJet 1600C printer
C3541A	HP DeskJet 1600CM PostScript printer standard unit includes: one HP DeskJet 1600C or 1600CM printer, one power cable, black and colour ink cartridges, User's Guide, online reference guide, and an HP Premium Paper sample pack. The printer interface cable is not included. The HP DeskJet 1600CM also includes HP JetDirect Print Server for Ethernet, LocalTalk, J2552A and Adobe™ PostScript™ Level 2 language SIMM.

The HP DeskJet 1600C redefines the office printer market by combining heavy-duty office printer performance with the high-quality colour printing capabilities demanded by business leaders. A single purchase brings colour to the entire workgroup!

The HP DeskJet 1600C combines professional black and colour printing  on plain paper

**HEWLETT®
PACKARD**

with fast office performance. It is specifically designed to expand with a business, with such features as an optional secondary paper tray, expandable memory, and true [Adobe™ PostScript™ Level 2](#) firmware, all of which can be purchased with the printer, or added later as printing needs change.

Print Quality	Inkjet print technology on plain paper. Four high capacity print cartridges: black, cyan, magenta, and yellow; 42cc ink per cartridge. Out-of-ink sensing stops printing and notifies user when a cartridge is out of ink. The built-in heater provides flat, dry output.
Speed and Throughput	9-pages-per-minute (ppm) rated engine speed for black-and-white documents; 1-2-ppm rated engine speed for colour documents; up to 4-ppm rated engine speed for mixed text and graphics.
Print Resolution	600 x 600 dpi black text 300 x 300 dpi colour with ColorSmart

Media Sizes: A4, letter, and legal. Envelopes: DL & C5. Plain paper, transparency film, special and glossy paper, envelopes and HP LaserJet style sheet labels (A4/Letter only).

Connectivity High-speed HP Bi-Tronics parallel interface provides data transfer up to 200KB/second. IEEE: 1284. Network interface slot accepts all HP JetDirect I/O cards. Ethernet and LocalTalk are included with HP DeskJet 1600CM. Automatic Language and I/O switching Network protocol-sensing.

Paper Handling Automatic and manual feed for paper and film; manual feed for envelopes and labels. Input tray holds 180 sheets of plain paper, 100 sheets of film; Output tray holds up to 100 sheets of plain paper. 500-sheet optional input tray, supports A4, letter, legal, and plain paper only.

Optional paper tray handles paper 60 to 135 g/m  **HEWLETT®

connect this printer to a network.

Designed with Network Administrators in mind; built-in features make it easy to

The number of trips to the printer are reduced due to the Windows and Macintosh drivers that switch printer settings directly from the workstation.

Special media can be stored in a separate tray, reducing the need to physically change the paper tray for letterhead or envelopes.

Less hassle: optional paper tray provides increased ease of use and versatility.

The HP DeskJet 1600CM also includes HP JetDirect Print Server for Ethernet

and LocalTalk, J2552A.
High-speed HP Bi-Tronics parallel interface provides data transfer up to

200KB/second. IEEE: 1284. Network interface slot accepts all HP JetDirect I/O cards. Ethernet and LocalTalk are included with HP DeskJet 1600CM. Automatic Language and I/O switching Network protocol-sensing.

RESULTS

HEWLETT®
PACKARD

HP [ColorSmart™](#) software ensures colours and dither patterns look their best.

HEWLETT®
PACKARD

Print on plain paper, inkjet paper, glossy paper or transparency

HEWLETT®
PACKARD

Output is dry and ready to go.

HEWLETT®
PACKARD

Colour gives business presentations a competitive edge by increasing attention and retention through flavour and accent.

HEWLETT®
PACKARD

Black text and grayscale images and graphics rival print quality from more expensive, high-quality monochrome printers.

HEWLETT®
PACKARD

Fast print speed for maximum productivity: prints up to nine pages per minute.

EASE OF USE

HEWLETT®
PACKARD

One-button control panel.

HEWLETT®
PACKARD

HP's [ColorSmart™](#) technology for professional, easy-to-use colour. [Out-of-ink](#) detection stops the print job and notifies the user when a cartridge is out of ink.

HEWLETT®
PACKARD

Four separate easy-to-replace print cartridges.

HEWLETT®
PACKARD

Flat, dry, ready-to-handle output.

HEWLETT®
PACKARD

Intuitive printer software drivers with extensive on-line documentation.

HEWLETT®
PACKARD

HP's exclusive REt and [ColorSmart™](#) software make it easy to print professional-quality documents for the office.

HEWLETT®
PACKARD

Easy printer switching with Windows and Macintosh because drivers are included, reducing trips to the printer.

HEWLETT®
PACKARD

Simple operation: front panel is self explanatory and the inkjet cartridges are easy to replace.

HEWLETT®
PACKARD

Compact size makes for easy maintenance and portability.

COST

HEWLETT®
PACKARD

Very low cost-per-page.

HEWLETT®
PACKARD

Excellent plain-paper print quality.

HEWLETT®
PACKARD

Using colour costs no more than using black.

HEWLETT®
PACKARD

Four separate cartridges and Out-of-ink sensing reduces ink waste.

HEWLETT®
PACKARD

EconoFast print mode saves time and ink.

HEWLETT®
PACKARD

Energy Star compliance reduces power consumption.

HEWLETT®
PACKARD

One purchase for colour and black/white printing.

HEWLETT®
PACKARD

Expandable: designed to grow as users business needs grow - need more memory? Just add it, no need to buy a new printer.

HEWLETT®
PACKARD

Great colour graphics and highlights add dimension to documents at no extra cost.

HP Image REt 1200

What Is It? The HP Color DeskJet 1600C/CM printers incorporate the new HP Image Resolution Enhancement technology 1200 (Image REt 1200). The result is photorealistic 1200-dpi-equivalent image quality, millions of solid colours and office standard HP DeskJet quality text.

How Does It work? HP Image REt 1200 technology, through accurate colour control techniques, lets the printer precisely blend up to four toner colours together--within the space of a single dot--to create a true solid colour. Like an artist mixing paints on a palette to get a desired colour, HP Image REt 1200 ensures precise colour creation by telling the HP Color DeskJet 1600C/CM printers to "blend" the exact amounts of primary colour toner needed to achieve a required shade.

For example, to print a solid, dark orange dot, Image REt 1200 "blends" a small amount of magenta toner with a larger amount of yellow toner and a tiny amount of black toner. If a slightly lighter shade is specified, HP Image REt 1200 precisely adjusts the amounts of magenta, yellow and black toner accordingly.

Older colour printers were forced to create colours by placing them side by side in dithered patterns, and the result is grainy, lower-resolution colour output. The HP Color DeskJet 1600C/CM printers, with HP Image REt 1200, can place colours on top of each other in precise proportions, and the result is solid, pattern-free colours. With HP Image REt 1200 technology, the HP Color DeskJet 1600C/CM printers join a new class of colour deskjet printers that produce smooth, "continuous tone" print quality.

What's The Benefit?

Photorealistic image quality: HP Image REt 1200 creates images that are 1200-dpi-equivalent. Images printed on the HP Color DeskJet 1600C/CM printers show a high level of detail, and colour transitions are smooth and natural.

Millions of solid colours: Graphics are sharp and crisp. Colors are pattern-free, without the dithered, lower-resolution look of older colour printers.

black or any colour.

Office standard HP LaserJet quality text: Crisp and readable, in

What Is It? The HP Color DeskJet 1600C/CM Windows Printing System is a collection of software designed to deliver great Windows colour printing. The software includes a ColorSmart™ (PCL and PostScript) Printer Driver for Windows 3.1 and 3.11, Windows for Workgroups 3.11, and Windows 95; HP FontSmart; JetAdmin for 3.1/NetWare; JetAdmin for Windows 95/NetWare; and an installer for easy installation of the system. The PCL Windows Printing System ships with the HP Color DeskJet 1600C/CM printers.

How Does It Work? With the Windows Printing System, users install the Windows printer driver and HP FontSmart on their computers. The driver allows Windows applications to communicate with the HP Color DeskJet 1600C/CM printers. A printer driver, the software that converts application output data into instructions for the printer, is accessible through the Windows Program Manager/Control Panel or through Windows applications. The Windows driver that is included with the HP Color DeskJet 1600C/CM Windows Printing System integrates HP ColorSmart, HP's unique colour management technology.

HP ColorSmart™ is a set of defaults that automatically apply to your colour output for different object types--Text, Graphics and Photos. This capability is especially useful for documents that include multiple object types. ColorSmart™ defaults provide high quality output for many colour printing needs. Users can turn the defaults off for enhanced colour control and adjust settings manually.

The Windows Printing System also includes HP FontSmart, a font management program for most fonts available in Windows. Users can create, delete, and manage True Type fonts as well as Adobe PostScript Type 1 fonts. FontSmart includes a collection of 110 screen and printer fonts. FontSmart saves disk space by storing fonts in a compressed format until they are installed and ready to use.

HP JetAdmin for 3.1/NetWare and HP JetAdmin for Windows 95 are also included in the Windows Printing System. More information on this software can be found in "Connectivity Solutions" Notables.

What's The Benefit?

Ease of Use--The installer guides users through the installation of all important software components. The printer driver and FontSmart have detailed on-line and context sensitive help. ColorSmart™ makes colour printing as easy as black and white printing.

Great Colour Documents--ColorSmart™ allows easy, high quality colour document creation. Manual settings allow for maximum colour and print quality control. Great variety of Windows fonts.

Flexibility--Users can choose among PCL or PostScript, manual or automatic driver settings, and font compression to store unused fonts.

Great Windows printing--All the elements needed for fast, high-quality Windows printing.

Product Summary And Technical Specifications

Convenient colour copying and powerful network printing in one affordable product...

Number

Standard Unit	Description
C3817A	HP CopyJet is a plain paper, drop-on-demand thermal inkjet printer-copier.
C3819A	HP CopyJetM PostScript™ configuration (includes HP JetDirect Print Server for Ethernet and LocalTalk, J2552A) is a network-configured, PostScript™, bundled, plain paper, drop-on-demand thermal inkjet printer-copier.

The HP CopyJet is an inkjet device offering both colour printing and colour copying in one affordable product.

The HP CopyJet printer-copier does not compromise quality, speed, or [reliability](#).

Robust driver support, strong network features, and colour copies at the press of a single button make this printer-copier a must for any office looking for convenient colour.

PRINTER

Print Quality HP CopyJet/M printer output is 600 x 300 dpi black text with [Resolution Enhancement technology](#) (REt) and [ColorSmart™](#). Print Cartridges use four high-capacity print cartridges; cyan, magenta, yellow and black; 42cc ink per cartridge. [Out-of-ink](#) sensing stops printing and notifies user when a cartridge is out of ink. Up to 16.7 million colours built in; get vivid colours easily with HP [ColorSmart™](#) technology.

Speed and Throughput Up to 7-pages-per-minute (ppm) rated engine speed for black-and-white documents. Up to 3-ppm rated engine speed for mixed text and colour graphics. Up to 1-ppm rated engine speed for full colour.

Typeface Capabilities HP CopyJet: Enhanced HP PCL 5c, PJL and HP GL/2 printer languages are standard. [Adobe™ PostScript™ Level 2](#) software is available in a SIMM-based option.
HP CopyJet M: All the above plus [Adobe™ PostScript™ Level 2](#) are standard.

Memory 3 SIMM slots for memory and PostScript modules.
HP CopyJet: Standard 5 Mbytes, expandable to 53 Mbytes. Up to 39 Mbytes with PostScript upgrade installed.
HP CopyJet M: Standard 7 Mbytes, expandable to 39 Mbytes. Memory Enhancement technology (MEt) allows most large, complex files to print within base memory

Connectivity Fast Centronics parallel interface provides data transfer up to 200KB/second. Network interface slot accepts all HP JetDirect print servers. Ethernet/LocalTalk HP JetDirect print server  included with HP CopyJetM printer-copier. Automatic language and I/O switching. Network protocol sensing.

Printer Languages **HP CopyJet:** Enhanced HP PCL 5c, PCL and HP GL/2 printer languages are standard. [Adobe™ PostScript™ Level 2](#) software is available in a SIMM-based option.
HP CopyJet M: All the above plus [Adobe™ PostScript™ Level 2](#) are standard.

Power 100 to 240 volts AC ± 10%. 50/ 60 Hz, 300 watts peak, 220 watts average maximum.

Dimensions Width: 460.5 mm.
Depth: 333 mm.
Height: 577.9 mm.
Weight: 30 kg.

Product Certification Pantone approved colours; Novell certified; UL listed to UL1950; CSA certified to CSA 22.2 No. 950; NEMCO licensed; complies with EN60950, DGN-approved; EMI: FCC certified Class B, DOC level B, EN 55022 Class B (Class A when using optional Class A network peripheral interface cards). PrEN 55024-2; prEN 55024-3; prEN 55024-4; registered VCCI, Class 2; approved under General Approval NS/G/1234/J/100003 for indirect connection to public communication systems within the United Kingdom.

Duty Cycle Rated maximum monthly usage: 8000 pages.

Warranty One-year warranty. Express Product Exchange Service. HP SupportPack is available.

COPIER

Print Quality HP CopyJet/M copier output is 300 dpi scan resolution and 30 bit digital scan source. Resolution; 16.7 million brilliant colours, and monochrome text with text enhancement technology. 50-400% reduction/enlargement capabilities in 1% increments: 6 preset settings.

Speed and

Throughput

Full-colour multicopy speed; 75 seconds for 1 copy, 1 cpm for Multi-copy. For black only multicopy speed; 30 seconds for 1 copy and 4 cpm for Multi-copy.

Specifications**Paper Types
and Weights**

Letter, legal and A4
Types; Cut-sheet plain paper (all sizes above); transparency film; inkjet paper and glossy
paper. 60 to 90g/m

**Duty Cycle**

Rated maximum monthly usage: 2,000 pages.

EASE OF USE

hinged/detachable cover.

1% increments or by choosing one of the eight pre-set settings.

No-hassle maintenance.

Designed for business use with full-size legal flatbed scanning surface and

Adjustable colour controls.

Enlarge or reduce copies from 50 to 400% (1% increments).

1-99 multiple copies and 180 sheet high capacity paper tray.

Easy to set up and use.

Adjustable colour controls provide greater control and versatility.

Enlarging and reducing documents accomplished easily by manually selecting

MIO slot makes the CopyJet easy to share over a network.

COST

Low cost-per-page.

Excellent print quality on plain paper and recycled stock.

[Out-of-ink](#) sensing.

4 separate print cartridges.

HP CopyJet actually pays for itself

prints and copies cheaper and faster than printers and copiers costing much more.

Reduces Service Bureau costs by its ability to reproduce and print colour images.

The only printer/copier in its class at one low purchase price.

System Compatibility

System	Software	HP CopyJet	HP CopyJet M
PC/XT/AT and compatibles	MS-DOS	*	*
386- and 486-based computers	MS-DOS	*	*
	Windows	*	*
	OS/2	*	*
Apple Macintosh	System 6.0.7 and higher		*
Workstations	HP-UX		*
	SunOS, Solaris		*
	SCO UNIX		*

Typefaces

- 35 Intellefont scaleable typefaces
- 10 TrueType scaleable typefaces
- 35 Adobe Type 1 scaleable typefaces for PostScript (HP CopyJet M)
- 1 bitmapped font

Physical Specifications

Height x width x depth: 578 x 461 x 330 mm
 Net weight: 30 kg

Duty Cycle

Rated monthly usage: 2000 pages

Product Certifications

Pantone-approved colours; Novell certified.
 Safety: UL listed to UL1950; CSA certified to CSA 22.2 No. 950; EMKO licensed; complies with EN60950.
 EMI: FCC certified Class B, NOMO-16-SCFI-1993, EN 55082-1; 1992, ICES-300, Issue 2, EN55022 Class B (Class A when using optional Class A network peripheral interface cards); prEN 55024-2; prEN 55024-3; prEN 55024-4; Registered VCCI, Class 2.

92215N	Macintosh Network Cable Kit

Print Cartridges

51640A	Black print cartridge
51640C	Cyan print cartridge
51640M	Magenta print cartridge
51640Y	Yellow print cartridge

HP Image REt 1200

What Is It? The HP Color CopyJet/M printers incorporate the new HP Image Resolution Enhancement technology 1200 (Image REt 1200). The result is photorealistic 1200-dpi-equivalent image quality, millions of solid colours and office standard HP CopyJet quality text.

How Does It work? HP Image REt 1200 technology, through accurate colour control techniques, lets the printer precisely blend up to four toner colours together--within the space of a single dot--to create a true solid colour. Like an artist mixing paints on a palette to get a desired colour, HP Image REt 1200 ensures precise colour creation by telling the HP Color CopyJet/M printers to "blend" the exact amounts of primary colour toner needed to achieve a required shade.

For example, to print a solid, dark orange dot, HP Image REt 1200 "blends" a small amount of magenta toner with a larger amount of yellow toner and a tiny amount of black toner. If a slightly lighter shade is specified, HP Image REt 1200 precisely adjusts the amounts of magenta, yellow and black toner accordingly.

Older colour printers were forced to create colours by placing them side by side in dithered patterns, and the result is grainy, lower-resolution colour output. The HP Color CopyJet/M printers, with HP Image REt 1200, can place colours on top of each other in precise proportions, and the result is solid, pattern-free colours. With HP Image REt 1200 technology, the HP Color CopyJet/M printers join a new class of colour laser printers that produce smooth, "continuous tone" print quality.

What's The Benefit?

Photorealistic image quality: HP Image REt 1200 creates images that are 1200-dpi-equivalent. Images printed on the HP Color CopyJet/M printers show a high level of detail, and colour transitions are smooth and natural.

Millions of solid colours: Graphics are sharp and crisp. Colors are pattern-free, without the dithered, lower-resolution look of older colour printers.

black or any colour.

Office standard HP LaserJet quality text: Crisp and readable, in

HP PCL 5

What Is It? The HP Color CopyJet/M Windows Printing System is a collection of software designed to deliver great Windows colour printing. The software includes a ColorSmart™ (PCL and PostScript) Printer Driver for Windows 3.1 and 3.11, Windows for Workgroups 3.11, and Windows 95; HP FontSmart; HP JetAdmin for 3.1/NetWare; HP JetAdmin for Windows 95/NetWare; and an installer for easy installation of the system. The PCL Windows Printing System ships with the HP Color CopyJet/M printers.

How Does It Work? With the Windows Printing System, users install the Windows printer driver and HP FontSmart on their computers. The driver allows Windows applications to communicate with the HP Color CopyJet/M printers. A printer driver, the software that converts application output data into instructions for the printer, is accessible through the Windows Program Manager/Control Panel or through Windows applications. The Windows driver that is included with the HP Color CopyJet/M Windows Printing System integrates HP ColorSmart, HP's unique colour management technology.

HP ColorSmart™ is a set of defaults that automatically apply to your colour output for different

object types  Text, Graphics and Photos. This capability is especially useful for documents that include multiple object types. ColorSmart™ defaults provide high quality output for many colour printing needs. Users can turn the defaults off for enhanced colour control and adjust settings manually.

The Windows Printing System also includes HP FontSmart, a font management program for most fonts available in Windows. Users can create, delete, and manage True Type fonts as well as Adobe PostScript Type 1 fonts. FontSmart includes a collection of 110 screen and printer fonts. FontSmart saves disk space by storing fonts in a compressed format until they are installed and ready to use.

HP JetAdmin for 3.1/NetWare and HP JetAdmin for Windows 95 are also included in the Windows Printing System. More information on this software can be found in "Connectivity Solutions" Notables.

What's The Benefit?

Ease of Use--The installer guides users through the installation of all important software components. The printer driver and FontSmart have detailed on-line and context sensitive help. ColorSmart™ makes colour printing as easy as black and white printing.

Great Colour Documents--ColorSmart™ allows easy, high quality colour document creation. Manual settings allow for maximum colour and print quality control. Great variety of Windows fonts.

Flexibility--Users can choose among PCL or PostScript, manual or automatic driver settings, and font compression to store unused fonts.

Great Windows printing--All the elements needed for fast, high-quality Windows printing.

HP ColorSmart

What Is It? Colour Management tools allow users to produce specific colour output quickly and easily. For the average user, colour is made simple through the HP Color CopyJet/M's ColorSmart™ settings. Advanced users can fine-tune colour output with multiple controls, such as ICC and Pantone profiles, and the HP Color Swatch Utility. Each technology provides a different solution to achieve optimal colour printing.

HP ColorSmart technology allows automatic definition of halftone and colour settings by object type: Text, Graphics and Photos. ColorSmart defaults provide high-quality output for most colour printing needs. Users can also turn the defaults off and adjust settings manually for enhanced colour control. This capability is especially useful for documents that include multiple object types.

ICC Profiles are available with the Windows 95 PCL driver, and support for Color Sync 2.0 will be available in Fall 1996. ICC Profiles support ICC-compatible Colour Management Systems. Colour management systems allow users to calibrate colours between monitors, scanners and printers. This technology provides cross-device colour matching and colour consistency between applications.

The **PANTONE** Color Matching System calibrates computer-generated colour to predefined ink-based colours. This system, traditionally used by graphic artists, is especially useful in matching a company's colours used in logos, product packaging, or company literature.

The **HP Color Swatch Utility** prints swatches that identify each colour by RGB (Red-Green-Blue) or CMYK (Cyan-Magenta-Yellow-Black) values. This utility is useful for identifying, matching, and generating specific colours.

How Does It Work? **HP ColorSmart** optimizes colour and halftoning automatically by using default settings for Text, Graphic, and Photo object types. The printer recognizes different object types, such as text, vector, graphic, and raster images, and assigns ColorSmart settings accordingly. Users can also turn off the default ColorSmart settings and adjust the colour, halftone, lightness, and saturation output for the different object types.

ColorSmart is enabled through the HP printer drivers and is supported in the following environments: Windows 3.1 (PCL & PostScript), OS/2 (PCL & PostScript), Mac GX and Quickdraw (first half of 1996), Windows 95 PCL and PostScript.

ICC Profiles work with a variety of colour management systems to simplify colour matching between different devices, such as monitors, scanners, and printers.

The **PANTONE Color Matching System** is also enabled through an HP Color LaserJet 5/5M profile. PANTONE profiles are accessed directly from applications, such as CorelDraw!, Adobe Illustrator, Micrografx Picture Publisher, and Adobe Photoshop. HP Color CopyJet/M Pantone profiles will be available through fulfillment at product introduction. The Pantone setting in the HP Color CopyJet/M printer drivers must be selected in conjunction with the PANTONE profiles.

The **Color Swatch Utility** prints up to eight pages of example colours and their accompanying RGB or CMYK values. By typing a simple DOS command, users can specify the colour type and the pages desired. With these pages, users can identify specific colour swatches they'd like to match, and generate that colour by defining the appropriate values within applications. The Color Swatch Utility is included on the printer's DOS driver diskette.

What's The Benefit? The HP Color CopyJet/M provides users with a versatile set of colour management tools to generate their desired colour output.

Simple, automatic colour plus unmatched colour control using ColorSmart defaults and manual colour settings.

Cross-device colour matching through ICC Profiles.

Utility.

Specific colour matching through Pantone profiles and the HP Color Swatch

HP ColorSmart

What Is It? Colour Management tools allow users to produce specific colour output quickly and easily. For the average user, colour is made simple through the HP Color DeskJet 1600C/CM's ColorSmart™ settings. Advanced users can fine-tune colour output with multiple controls, such as ICC and Pantone profiles, and the HP Color Swatch Utility. Each technology provides a different solution to achieve optimal colour printing.

HP ColorSmart technology allows automatic definition of halftone and colour settings by object type: Text, Graphics and Photos. Out-of-Ink Sensing

What Is It? Out-of-ink sensing alerts the user when a cartridge is out of ink or has restricted ink flow. When alerted, the user can replace the cartridge or prime it.

How Does It Work? *Step 1.* When a new ink cartridge is installed, HP CopyJet resets a counter dedicated to that cartridge slot. It counts the number of droplets released for that cartridge.

Step 2. When the counter indicates that most of a cartridge's ink has been used, HP CopyJet begins frequent tests of the nozzles for the presence of ink. When no ink is detected, printing or copying stops and HP CopyJet displays a "check print cartridge" message in the display. A blinking arrow in the message window flags the cartridge that is out of ink. If this occurs during a print job, the user's computer or network server may pass some type of "check printer" message to the user.

Step 3. The user can install a new cartridge and continue printing. In this case the ink-droplet counter for that cartridge is restarted at zero. Or, the user can continue printing with the failed cartridge, preferably after priming it. In this case, HP CopyJet re-tests the failed cartridge at the end of each page. The user is notified every time the cartridge fails. This cycle of re-testing continues until the cartridge either passes a test or is replaced.

Even when none of the counters indicates low ink HP CopyJet tests each cartridge periodically to detect restricted ink flow. If restricted ink flow is found, the user can then prime the cartridge manually by opening the cover, moving the cartridge selector to the clogged cartridge, and pressing the plunger next to the cartridge mechanism.

Each print cartridge has a built-in electronic "ID" which HP CopyJet reads. The HP CopyJet can maintain droplet counts for two cartridges per slot. This allows users to swap same-colour cartridges. More-full cartridges can be used for long jobs; less-full cartridges for small jobs. As long as no more than two same-colour cartridges are interchanged, the HP CopyJet can track them.

What's The Benefit? By halting a job when a cartridge is empty or when restricted ink flow is detected, out-of-ink sensing provides several important benefits:

-  Saves money by reducing ink and media waste
-  Saves time, because jobs come out right the first time
-  Saves wear-and-tear on print mechanism
-  Increases the HP CopyJet's availability since fewer repeat jobs are

run

By tracking two cartridges per slot, HP CopyJet allows greater flexibility to use all of the ink in a cartridge.

Out-of-Ink Sensing

What Is It? Out-of-ink sensing alerts the user when a cartridge is out of ink or has restricted ink flow. When alerted, the user can replace the cartridge or prime it.

How Does It Work?

Step 1. When a new ink cartridge is installed, HP DeskJet resets a counter dedicated to that cartridge slot. It counts the number of droplets released for that cartridge.

Step 2. When the counter indicates that most of a cartridge's ink has been used, HP DeskJet begins frequent tests of the nozzles for the presence of ink. When no ink is detected, printing or copying stops and HP DeskJet displays a "check print cartridge" message in the display. A blinking arrow in the message window flags the cartridge that is out of ink. If this occurs during a print job, the user's computer or network server may pass some type of "check printer" message to the user.

Step 3. The user can install a new cartridge and continue printing. In this case the ink-droplet counter for that cartridge is restarted at zero. Or, the user can continue printing with the failed cartridge, preferably after priming it. In this case, HP DeskJet re-tests the failed cartridge at the end of each page. The user is notified every time the cartridge fails. This cycle of re-testing continues until the cartridge either passes a test or is replaced.

Even when none of the counters indicates low ink HP DeskJet tests each cartridge periodically to detect restricted ink flow. If restricted ink flow is found, the user can then prime the cartridge manually by opening the cover, moving the cartridge selector to the clogged cartridge, and pressing the plunger next to the cartridge mechanism.

Each print cartridge has a built-in electronic "ID" which HP DeskJet reads. The HP DeskJet can maintain droplet counts for two cartridges per slot. This allows users to swap same-colour cartridges. More-full cartridges can be used for long jobs; less-full cartridges for small jobs. As long as no more than two same-colour cartridges are interchanged the HP DeskJet can track them.

What's The Benefit? By halting a job when a cartridge is empty or when restricted ink flow is detected, out-of-ink sensing provides several important benefits:

-  Saves money by reducing ink and media waste
-  Saves time, because jobs come out right the first time
-  Saves wear-and-tear on print mechanism
-  Increases the HP DeskJet's availability since fewer repeat jobs are run

By tracking two cartridges per slot, HP DeskJet allows greater flexibility to use all of the ink in a cartridge.

Adobe PostScript Level 2

What Is It? PostScript is a programming language called a Page Description Language (PDL). PDLs arrange text, graphics and images on an area equivalent to a printed page prior to printing by a raster image device. PostScript, like HP's PDL page description language, gives users comprehensive control over the appearance of the printed page. Adobe Systems Inc. developed Adobe PostScript.

Adobe PostScript is a proprietary page description language owned solely by Adobe and licensed to HP. HP's relationship with Adobe started in 1988 when HP began shipping PostScript for the HP LaserJet III printer. The solution was co-developed by HP and Adobe. Since that time, HP and Adobe have worked together to provide PostScript solutions on HP LaserJets, DeskJets, PaintJets and DesignJets.

Other manufacturers have PostScript implementations -- "clones". These clones allow their printers to receive and process PostScript commands. But "true" Adobe PostScript printers, such as the HP DeskJet 1600CM, actually use Adobe's code. Actually using Adobe's code assures 100% compatibility in PostScript printing. The HP DeskJet 1600CM is in compliance with the Adobe PostScript standard. Adobe is the "original" PostScript and claims the best quality and the best performance versus the PostScript clones.

How Does It Work? The HP DeskJet 1600CM receives a description of the page to be printed -- including lines, shapes, fonts, and colours -- and formats that information on a specialized processor built into the PostScript SIAM. The processor then converts that information into dots on the page and sends it to the printer to be printed.

What's The Benefit? The benefits of PostScript are:

The exact same file can print on more than one PostScript device.

This is known in the industry as device independence.

printer on a network.

Mixed host environments (i.e. Windows/DOS, MAC) can share the PostScript

Provides consistent colour across PostScript Level 2 devices.

You should purchase the PostScript option if:

1. You are using a software program that works best if output on a PostScript printer (example: Adobe Illustrator)
2. You want the exact same print file to print on more than one device. Graphic artists often need to do this when they print a file on a local printer (this is called "proofing") before sending the file to a typesetter for final printing.
3. You plan to connect one or more Macintosh computers. PostScript is required for the Macintosh to print on the HP DeskJet 1600C printer.

If you still are not sure you need PostScript, the HP DeskJet 1600C printer allows you the flexibility of purchasing it later when the need becomes apparent.

Adobe PostScript Level 2

What Is It? PostScript is a programming language called a Page Description Language (PDL). PDLs arrange text, graphics and images on an area equivalent to a printed page prior to printing by a raster image device. PostScript, like HP's PDL page description language, gives users comprehensive control over the appearance of the printed page. Adobe Systems Inc. developed Adobe PostScript.

Adobe PostScript is a proprietary page description language owned solely by Adobe and licensed to HP. HP's relationship with Adobe started in 1988 when HP began shipping PostScript for the HP LaserJet III printer. The solution was co-developed by HP and Adobe. Since that time, HP and Adobe have worked together to provide PostScript solutions on HP LaserJets, DeskJets, PaintJets and DesignJets.

Other manufacturers have PostScript implementations -- "clones". These clones allow their printers to receive and process PostScript commands. But "true" Adobe PostScript printers, such as the HP CopyJet M, actually use Adobe's code. Actually using Adobe's code assures 100% compatibility in PostScript printing. The HP CopyJet M is in compliance with the Adobe PostScript standard. Adobe is the "original" PostScript and claims the best quality and the best performance versus the PostScript clones.

How Does It Work? The HP CopyJet M receives a description of the page to be printed -- including lines, shapes, fonts, and colours -- and formats that information on a specialized processor built into the PostScript SIMM. The processor then converts that information into dots on the page and sends it to the printer to be printed.

What's The Benefit? The benefits of PostScript are:

The exact same file can print on more than one PostScript device. This is known in the industry as device independence.

printer on a network.

3. You plan to connect one or more Macintosh computers. PostScript is required for the Macintosh to print on the HP CopyJet printer-copier.

If you still are not sure you need PostScript, the HP CopyJet printer allows you the flexibility of purchasing it later when the need becomes apparent.

HP JetPrint for Novell NetWare

What Is It?	HP's most advanced network printer management capabilities are integrated into the latest release of the HP JetPrint Utility for NetWare. This version boasts all the functionality of the previous version plus additional benefits provided for the HP DeskJet 1600C and 1600CM printers with the HP JetDirect networking card installed (J2552A).
How Does It Work?	JetPrint works with Windows 3.X, Windows for Workgroups 3.X, Windows NT, and Win-OS/2. Users have easy access to all assigned printers on the NetWare network. Automatic installation of the HP Windows printer driver plus printer and print job status enhance the user's network printer experience.
What's The Benefit?	<p>New icons... HP JetPrint will automatically associate an icon depicting the HP DeskJet 1600C/CM printers on the network. The user is presented an easy-to-recognize icon instead of a long queue name.</p> <p>General usability and performance enhancements... HP JetPrint supports <i>Always-on-top</i> and features an enhanced user interface.</p> <p>Network printer ease of use... Easy selection of network printers, drag-and-drop printing, and printer and print job status information such as job complete, out of paper, etc.</p> <p>Favorite Printers... Users have the ability to create their own list of favorite printers, eliminating the need to browse through all accessible network printers.</p> <p>Automatic driver install and updates... HP JetPrint automatically provides access to the newest or latest version printer driver over the network.</p> <p>Advanced printer status... HP JetPrint provides real-time printer status through a Management Information Base (MIB). For example, when a print cartridge runs out of ink, HP JetPrint reports the condition to the user, identifying which ink cartridge needs replacement.</p>

HP JetPrint for Novell NetWare

HP JetDirect Network Card

What Is It? The HP JetDirect Card for Ethernet/802.3, 10Base-T, and 10Base2 networks (HP model number J2552A) is a network interface card that is inserted into the HP DeskJet 1600C printer to provide a direct network interface. The card supports multiple network operating systems (NOS) including Novell NetWare, Microsoft LAN Manager, OS/2 LAN Server, Windows NT, Windows for Workgroups, Apple EtherTalk, Apple LocalTalk, HP-UX, SunOS, Solaris, SCO UNIX and IBM AIX. The card comes pre-installed in the HP DeskJet 1600CM PostScript printer, or may be purchased separately and installed in the HP DeskJet 1600C base model printer.

The card allows you to attach a printer directly to your network at any location while providing increased ease of use, network management, and printer I/O performance. Advanced printer and job management are provided through a Management Information Base (MIB) which is supported through the industry standard Simple Network Management Protocol (SNMP).

The J2552A HP JetDirect network card is included with the HP DeskJet 1600CM PostScript bundle. Purchasers of the HP DeskJet 1600C (base model) can purchase the card separately.

How Does It Work? The HP JetDirect network card conforms to HP's MIO version 6.0 specification. It has an onboard processor dedicated to handling network printing and contains the hardware necessary to connect directly into the network wiring. It plugs into the back of HP DeskJet 1600C printer and functions similarly to -- although much more efficiently than -- a dedicated PC print server.

What's The Benefit?

Flexible location...
The ability to place the printer anywhere on the network eliminates the need to attach the printer directly to a server or workstation.

Enhanced printer status and diagnostics...
Provides users and administrators status feedback and control of the printer over the network using HP JetPrint and HP JetAdmin network printer utilities.

Automatic Protocol Switching...
Automatically detects the network protocol of a print job and switches to that protocol.

Improved Network Management...
Supports SNMP that allows remote management and troubleshooting of the printer.

Automatically detects the network protocol of a print job and switches to that protocol.

Improved Network Management...
Supports SNMP that allows remote management and troubleshooting of the printer.

Reliability

What Is It? Printer reliability relates to the customer's overall satisfaction with the product. A reliable printer is one that consistently meets expectations. When the printing process is interrupted by an unforeseen event (such as a paper jam or software driver error) their perception of the printer's reliability is affected. Therefore, a reliable printer is one that minimises the number of customer interactions and downtime to restocking consumables. Two popular measurements of printer

reliability are *mean-time-between-failures* (MTBF)  expected time elapsed between printer failures) and *mean-time-between-interactions* (MTBI

 expected time elapsed between abnormal printer interactions). However, there is no industry-standard process for obtaining these numbers, so they are difficult to interpret. Therefore, HP has developed a more friendly specification called *duty cycle*. This refers to the number of pages per month a customer should consider the maximum usage of the product. Therefore, duty cycle is a key element in determining the appropriate printer for a given customer.

What's The Benefit? Recent surveys show that over 99% of customers purchasing printers for business consider reliability as an important factor in their decision. Reliability is not normally considered a top consideration (i.e. customers seldom choose a printer solely because it is the most reliable printer on the market), but a printer that is not perceived as reliable will usually not be investigated further, no matter how rich its feature set. Of particular interest is the fact that customers attribute reliability to the manufacturer, not to an individual model. Most customers do not go beyond that, but a few customers, government buyers and those more experienced with buying printers, will ask for MTBF numbers. HP does not make a regular practice of sharing MTBF numbers publicly, but they are available if required for a sale or contract. Duty cycle is published on all product literature and should be used freely in the sales process.

Why Buy HP? HP enjoys a very good reputation of reliability thanks to an amazing track record with both HP LaserJet and DeskJet lines. Building a reputation for building a reliable product comes with time. HP has been manufacturing quality colour printers for ten years, beginning with the HP PaintJet which was introduced in 1986. And before that, HP was the market leader in colour pen plotters. HP continues that leadership with innovative products and exciting technologies such as Thermal InkJet (TIJ), Colour Resolution Enhancement technology (C-REt), an internal heater, ColorSmart™, and pigmented black inks.

One final thought: HP is the leader in inkjet technology. All the inkjet products in the HP line have stood the test of millions of satisfied customers. The HP DeskJet 1600C and the HP CopyJet are particularly well-suited for the office because of their robust performance and dependable print quality. HP backs these colour office printers with a one-year warranty that includes all parts, labor, shipping and handling. Industry-leading print quality, robust performance, high duty-cycles and excellent warranties are all important parts of HP's reliability story.

HP JetAdmin Features

	JetAdmin for NetWare Win 31, DOS, NT/Novell	JetAdmin for Windows 95 Win95/Novell Win 95 net	JetAdmin for OS/2 Lan Ser OS/2 / OS/2	JetAdmin for UNIX UNIX/UNIX	LaserJet Utility (mac) MAC/MAC	Windows NT port monitor NT/NT	WfW port redirector W/W net /WfW	Lserv/Lman LAN Server &LAN MGR
1. Ability to configure and print to HP JetDirect printers on the net	*	*	*	*	*	*	*	*
- Ability to easily configure HP JetDirect printers	*	*	*	*	*	*	*	*
- Ability to print to HP JetDirect printers on the net	*	*	*	*	*	*	*	*
2. Printer Visibility and Status	*	*	*	*	*		*	
- Printer status is available to administrator and end-user (paper out, toner low)	*	*	*	*	*	*	*	
- Printers capabilities (colour, duplex, PCL, ppm) are easily visible		*	*		*			
- Administrator can search the net for printers to monitor based on capabilities					*		*	
- Users can see if printer is available before sending a document to print	*	*	*	OS	*			OS
- Printer functions (lock control panel) are available remotely from PC's	*	*	*		*			
- JetAdmin features available for File Server connected printers as well	*	*		OS	NA			
3. Improved Asset Tracking	*	*	*	*	*			
- Printer identity available (i.e. model, name network#, address)	*	*	*	*	*	*	*	*
- Printer capabilities available (i.e. language, duplex, colour, paper)		*	*		*			

- Printer status capabilities available (ready, printing, toner low, door open)	*	*	*	*	*	*	*	*
4. Auto Driver Distribution, & Configuration	*	*		NA	*			
- Auto driver association and downloading to client system	*	*		NA				
- Auto printer driver configuration for printer options installed (i.e. RAM)	*	*		NA	*			
- Ability for users to select new configured printer on net & "Just Print" to it		*		NA	*	OS	OS	
5. Real Time Job Monitoring				*	*	*		
- Real-time remote printer status for user and administrator	*	*	*	*	*			*
- "True end-of-job" notification to users and administrators	*	*	*	*				
- Percent complete and page number printing to user and administrator			*	*				
- Enhanced error recovery (printer starts printing at page 19 not page 1)			*	*				
6. Remote Diagnostics	*	*	*	*	*			*
- Diagnostics of JetDirect connection and status	*	*	*	*	*			*
- Diagnostics of file server connection and status	*	*	*	*	NA	NA	NA	*
