Activating *GLASSman*

Please click on the item you need help on:

GLASSman Optionen

Display
- ● Show border
- ● Use magnificient

Zoom
- ○ factor 2 ● factor 4 ○ factor 8 ○ factor 16

Activate with hotkey:

CTRL + SHIFT + Z

[✔ OK] [✖ Cancel] [? Help]

You have several possibilties to activate the zooming of GLASSman.

Starting the program will activiate the zooming and the area pointed to by the mouse cursor will be enlarged.

If   GLASSman is still running, you have three possibilities to activate the zooming:
1. Restart GLASSman. The program will recognize that it was started before and activates the running version.
2. Activate the running program by the Enter key.
3. Use the hotkey you have defined in the option box.

Options

GLASSman Options: Show border

With this option you can activate a frame around your zoomed area.

GLASSman Options: Use magnificient

Using this option the border of the zoomed area will be shrinked and no screen information will be lost. So you are able to enlarge an area and simultaniously see the surrounding area.

GLASSman Options: Zoom

Using this option you are able to select the zooming factor. Possible values are 2, 4, 8 and 16.

GLASSman Options: Activate with hotkey

Here you define the hotkey to activate the zooming function of *GLASSman.* To use this option *GLASSman* has to be running.
