

HyperGlot Software Company presents:
LEARN TO SPEAK SPANISH

Please note that you should copy the Learn To Speak Spanish Demo file to your hard drive before launching it. This is necessary because of the extensive sound in the demo. If you run it from the floppy, the sound quality will not be very good.

You must have HyperCard 2.0 or higher to run this demo.

If you have a MacRecorder you may take advantage of the recording feature of this demonstration. Make sure that you have connected the MacRecorder and have the MacRecorder driver in your System folder at startup.

Thanks for your interest in our products!
