

## Macintosh IIsi Compatibility with Best-Selling Software

(As of October, 1990)

The Macintosh IIsi is compatible with virtually all current releases of application software. To help you ensure that you have an appropriate version of the application you intend to use, we have provided a list of the most recent versions of some popular Macintosh applications. This is by no means a comprehensive list of applications or versions of applications that are compatible with the Macintosh IIsi. Please contact your dealer or the software developer if you have any questions. They can help you identify the newest version of a particular application or tell you how to upgrade your current version if necessary. For best results, we recommend you use the latest versions of software and hardware products with your Macintosh IIsi.

<u>Developer</u>	<u>Application</u>	<u>Latest Version</u>	<u>Information</u>
Aldus Corporation	Persuasion	?	1-800-xxx-xxxx
