ApplelIGS

Overview

The Apple II cs personal computer is the most powerful, most colorful Apple II evermade. Combining the best of the previous Apple II computers—built-in accessory ports for easy addition of peripherals, and versatile expansions lots for system customization—the Apple II cs provides an easy-to-use interface similar to that of the

Macintosh®personal computer. It also offers powerful features such as high-resolution color graphics, 15-voices ound capability, and the advanced 65 C816 microprocessor.

The Apple II cs features GS/OS*, an operating system developed exclusively to take a dvantage of the computer's hardware features. GS/OS offershigh-performance capabilities such as rapiddisk access and program launching, while increasing the system's ease of use.

Powerfulhardwarecapabilities and advanced systems of tware that puts them at your fingertips: It all adds up to the ultimate Apple Il personal computer.

Features

Benefits

- Powerful16-bit65C816processor	 Runssoftwarethattakesadvantageofthe advancedgraphicsandsoundcapabilitiesofthe Apple IIGSsystem.
- Compatible with the 65C02 microprocessor used in the earlier Apple II systems	 Runs virtually all existing Apple II software—thousands of programs, including the educational software used by many schools. Protects your investment by letting you upgrade or trade up without sacrificing software or hardware compatibility.
512kilobytesofusermemory(RAM)	· Allows you to work with large documents (spreadsheets, databases, and so forth).
Sevengeneral-purposeexpansionslots	Provides a virtually unlimited growth path.
- Sevenperipheralsports	 Allowsyoutoconnectcommonlyused peripherals (such as disk drives, a printer, an RGB or composite monitor, a modem, and Apple Talk® network devices) without the need for special interface cards.
One dedicated memory expansion slot	Letsyoueasilyexpandthesystemmemory toasmuchas 1.25 megabytes, using the Apple IIcs Memory Expansion Kits. Permits expansion to 8 megabytes when higher-capacitychips become available.
Built-in32-oscillatorsoundchip	Letsyoucomposeforandsimultaneously playbackasmanyas15separateinstruments, soundeffects, orvoices.
Built-in speaker and standard output jack for external speakers or headphones	Permitsthesoundsofmusic, games, educationalsoftware, and even human voices to be presented with startling realism.
Two super-high-resolution graphics modes, offering a palette of 4,096 colors	 Letsyouproduce richly detailed graphics using home, school, orbusiness applications. Enables the development of graphically enhanced educational and productivity applications.

Product Details

The Apple IICS personal computer features the Apple IICS System Software Version 4.0, which includes the following:

GS/OSoperatingsystem
ExclusivelycreatedfortheApple
IlGspersonalcomputer,GS/OS
dramaticallyincreasesthespeedof
bothdiskaccessandprogram
launching. Italsoincludes File
SystemTranslators (FSTs) that
allowapplications to directly access
files created using other file
systems, such as the ISO/High
Sierra file system used by
CD-ROMdevices.

Finder

The Apple IIGS Finder[®] has been revised extensively to take full advantage of the GS/OS operating system. In addition to providing support for disk partitions and other new features, the Apple IIGS Finder is now easier to use, faster, and more informative than the earlier version.

Advanced Disk Utility Withitsgraphics-basedinterface, the Advanced Disk Utility makes it easy for you to initialize, name, erase, and partition hard disks, as well as to work with both 5.25- and 3.5-inch floppy disks.

Installer

Thisprogramallowsyoutoupdate your startup disks with the latest systems of tware. It also lets you add special system files to customize startup disks for use with your particular system configuration.

Technical Specifications

Central processing unit (CPU)

- Microprocessor:65C816
- Clockspeed: 2.8 or 1.02 megahertz; user-or software-selectable
- Addressbus: 24bits
- Databus:8bits
- Addressrange: 16,777,216 bytes
- 16-bitregisters:

accumulator, two index registers, direct register, stack pointer, and program counter

- 8-bitregisters:databank, programbank,andstatus
- Addressablememory:upto8 megabytesofRAM(random-access memory)andupto1 megabyteof ROM(read-onlymemory)

Memory

- 512KofRAM, expandable to 8 meabytes
- 128KofROM, expandableto 1 megabyte

Text display modes

- 40columnsby24lines
- 80columnsby24lines

Graphics display modes

- Super-high-resolution
- -320dotshorizontallyby200dots vertically, in up to 16 colors per lineand 256 colors perscreen, from a palette of 4,096 colors
- --640 dots horizontally by 200 dots

vertically, in 4 or more colors per line and 128 colors per screen, from a palette of 4,096 colors

- Double-high-resolution (560 dots horizontally by 192 dots vertically; 16 colors)
- Double-low-resolution (80 dots horizontallyby 48 dots vertically; 6 colors)
- High-resolution (280 dots horizontallyby 192 dots vertically; 6 colors)
- Low-resolution (40 dots horizontallyby 48 dots vertically; 16 colors)

Sound capability

- Ensoniq32-oscillatordigital synthesizerchipwithdedicated 64kRAM
- -Produces up to 15 voices simultaneously
- -Uses internal speaker, or external speaker or headphones via audio output jack (volume is set through the Control Panel)

Character sets

 32 letters (uppercase and lowercase), 32 special characters, 32 Mousetext characters, and 12 unique characters for each of these international character sets: U.S., U.K., French, Danish, Spanish, Italian, German, and Swedish

Kevboard

- Standardtypewriter-style
- · 80keys,plus14-keynumeric keypad
- Two Apple Desktop Bus[§] connectors (one for attaching the keyboard to the computer; one for daisy-chaining additional input devices)
- · Keyboardlayouts(selectable through the Control Panel)
- -QWERTY(Sholes)
- -Dvorak
- -Nine international (all those listed under Character sets, plus French Canadian)

Interfaces

- Expansionslots
- -OnemultipurposeRAM/ROM memory expansion slot
- -Sevengeneral-purpose input/ output slots for peripherals control cards, all fully buffered, with interrupt and DMA priority
- Serialports:two8-pin minicircular connectors (either can be used to connect Apple Talk devices); utilize SCC communications chip
- Disk-drive port: one 19-pin Dstyle connector (allows daisy-chain connection of up to four Apple 3.5, Apple 5.25, or UniDisk* disk drives)

Technical Specifications (continued)

- Videooutput
- -Analog RGB, via 15-pin D-style connector
- -Compositecolor, via RCA phono connector
- Apple Desktop Busport: one 4-pinmini-circular connector on backofcomputer
- Gamel/O:9-pin D-style connectorforjoysticks, graphics tablet, and other such devices
- Audio
- -RCAminiheadphone/speaker outputjackwithprogrammable volume control
- --Input/Outputconnectoronmain logicboard

Operatingsystems

- SSSS
- ProDOS®16andProDOS8
- Pascal
- DOS33
- CP/M(withappropriate coprocessorcard)

Otherfeatures

- Real-timeclock(setthrough the Control Panel)
- BatterybackupforControl Panelsettings

Electrical requirements

- Linevoltage: 107to 132volts AC;50to60hertz
- Powerconsumption:
- -Typical:11 watts
- -Maximum:60 watts
- Supplyvoltages:
- +5 volts (±3%)
- +12 volts (±6%)
- -5 volts (±10%)
- -12 volts (±10%)
- Maximum supply currents:
- +5volts:2.5amps
- +12volts: 1.5amps
- -5volts:250milliamps
- -12volts:250milliamps

Environmental requirements

- Operating temperature: 32°to113°F(0°to45°C)
- Maximumtemperatureon power-supply case: 130°F (55°C)
- Relative humidity: 5% to 85%

Safety and EMI qualifications

- FCCPart15ClassBComputing Devices
- CSA22.2,No.154-1979
- UL114-Office Appliances and BusinessEquipment

Size and weight (main unit)

- Height: 4.6in. (11.7cm)
- Width: 11.2in. (28.4cm)
- Depth: 13.7in. (34.8cm)
- Weight: 8.72lb. (3.96kg)

Ordering Information

Apple IIGS OrderNo.A2S6010

Withyourorder, you'll receive:

- Apple IIGS personal computer with 512 K of RAM and 128 K of
- Apple Desktop Busdetached keyboardwithnumerickeypad
- Keyboardcable
- AppleDesktopBusmouse
- Powercord
- AppleIIGS System disk
- Apple IIGS System Tools disk
