# DataAccessLanguageServerforVAXV/MS

### Overview

The Data Access Language (DAL) Server for VAX VMS is an etworking software product that provides DAL access to files and databases on a VAX VMS host system. Running on the VAX VMS host, the Data Access Language Server works cooperatively with personal computer applications that support Data Access Language, such as spread sheets, databases, and query to ols on Apple Macintosh computers.

Atotal Data Access Language connectivity solution for VAXVIVIS includes a dient personal computer running an application with embedded Data Access Language support, and a VAXVIVIS host with the Data Access Language Server. The DAL Serverreceives requests from the personal computer application, carries the mouton the VAX, and sends the desired data back to the application for local processing.

The Data Access Language Server for VAXVMS provides uniform support for Data Access Language based applications, through a variety of network configurations and VAXVMS data managements of tware. It works with existing VAXVMS data bases, operating understandard VMS and data bases ecurity. As a result, Macintosh computer users receive seamless, transparent access to the VAX data they are authorized to access.

# Features

# **Benefits**

<ul> <li>Serveroperates as a user process under standard VMS username/password security</li> </ul>	<ul> <li>Maintains the security and integrity of VAX/</li> <li>VMS and the database management system.</li> <li>Eliminates the need for new system administration procedures on the VAX.</li> </ul>
<ul> <li>UniformsupportforDataAccessLanguage dients</li> </ul>	AllowsoneservertosupportallMacintosh computersrunningDataAccessLanguage- compatibleapplications.
<ul> <li>Uniform concurrent support for VAX databases</li> </ul>	<ul> <li>Insulatespersonal computer applications from the complexities of the database being used.</li> <li>Supports multivendor environments.</li> </ul>
Standard VAX/VMS installation procedures	<ul> <li>Makes installation quick and easy.</li> <li>Allows the user to continue other work while the Data Access Language Server performs a connectivity request.</li> </ul>
· Asynchronousoperation	<ul> <li>Returnsprogram control to the Macintosh so the user can perform other tasks while the Data Access Languages erver carries out the requested operation on the host.</li> </ul>
Incremental compiler implementation	Reduces the dient system processing load.
· Tracefacility	· Facilitatesdebuggingandsystemtuning.
<ul> <li>Interactive utility for testing Data Access Language programs tatements</li> </ul>	· IDALensuresproperconnection, installation, and operation of host server.
· Storedprocedures	<ul> <li>Minimizes network traffic by storing commonly located procedures on the host, where they can be shared.</li> </ul>
· Sampletables	Makesdevelopingandtesting applicationseasier.
NAS-large and Samuel Control of the	Por idea area dela di anti di anti
<ul> <li>Widerangeofcommercialapplications with DataAccessLanguageconnectivity available today</li> </ul>	<ul> <li>Providesspreadsheet, query tool, and mapping tool users with seamless host data integration with no programming effort.</li> </ul>

#### System Requirements

Tousethe Data Access Language Server for VAXVVMS, you need the following:

- Hostenvironment: VAX/VMS version 5.1 (or later)
- Macintosh computer clients running Data Access Languagecompatible applications
- · One or more of the supported databasemanagements ystems
- Theappropriate networking hardware and software

#### **Product Details**

#### Database Support

- Informixversion 2.1 (or later)
- Ingresversion 6.1 (or later)
- Oracle version 5.1.22 (or later)
- Oracleversion 6.0
- Rdb/SQLversion3.1(orlater)
- SybaseSQLServerversion3.0 (or later)

The Data Access Language Server provides standard database naming, data types, system catalog structure, error codes, and buffer management.

#### **ClientSupport**

 Uniform support for any application developed with Data Access Language Developer's Toolkitfor the Macintoshusing a supported network

#### **Network Support**

- Asynchronous direct and dialupconnections
- Supportforthe Apple Talk® networksystem (requires Apple Talkfor VMS version 2.0.6 or laterfor Phase I and version 2.1 for Phase II), which is supplied with Data Access Language Serverfor VAXVMS.

### Asynchronous Communications

- Transmissionspeed:300to 19,200 baud
- Characterlength:

7or8databits;1or2stopbits

- · Parity: Odd, even, or none
- Handshake
- -XONXOFFandnone
- -Modemanddirect connections
- -Log-onsequencespecification
- Protocol
- -Error-correcting(16-bitCRC)
- -Datacompression
- -Binarydatatransparency

#### Resource Usage

- 1 megabyte of disk storage
- Properusage verified bytest program
- Onesharable, reentrant
   200K-300K process shared by all attached Macintoshapplications

## DataAccessLanguageServerforVAXVVMS

#### Language Specifications

DALisa complete language for describingconnectivitytasks. The Data Access Language consists of these statement groups:

Hostconnectionstatements, whichestablishandterminatea connection to a host system in the network, providing concurrent

access to multiple hosts running DataAccessLanguageServers

- Datamanipulationstatements, which offer complete ANSI standardlevel1,SQL-baseddata accesstohostdatabases
- Program structure statements, which support testing, looping,

and procedure calls within a Data AccessLanguageprogram

Output statements, which generateoutputmessagesfromthe DataAccessLanguageprogram; thesemessagesareprocessedby the client application

### Ordering Information

Toorderthe Data Access Language ServerforVAXVMS.contact:

**Apple Programmers and Developers**Association (APDA<sup>š</sup>) AppleComputer, Inc. Cupertino.CA95014-6299

20525MarianiAvenue,M/S33G

(800)282-2732

### Data Access Language Server for VAXVIMS

Withyourorder, you receive:

A9-tracktape(OrderNo. C0142LL/C)orTK50cartridge (OrderNo.C0143LL/C) containing the Data Access Language Server software and the installation and configuration programs

**DataAccessLanguageServer** Installation and Operating Guide for VAXVMS (OrderNo.M0934LL/A)

90daysoffreesoftware supportfromApple'sTechnical AnswerLine. Aftertheinitial 90-day period, annual support contracts are available for a fee.
