Apple Authorized Training Center Program

Overview

The Apple Authorized Training Center (AATC) Program brings high-quality training on the Macintosh® personal computer to your local authorized Apple dealership.

Courses offered through this program cover everything from basic Macintosh skills to the advanced use of Macintosh applications. Subjects include word processing, spreadsheets, databases, graphics, page layout, and presentations. A major emphasis of each course is how you can integrate applications to increase your productivity and take full advantage of your Apple® Macintosh system.

All AATC members must meet rigorous criteria to join the program, so you can be sure that they're dedicated to meeting your training needs. In addition, because AATC members are also authorized Apple dealers, they can offer you ongoing assistance with hardware, software, and support after the training.
