### Communications Tools for the Macintosh Communications Toolbox

## Overview

Communications Toolsforthe Macintosh® Communications Toolboxenableapplicationsto provideconnection, terminal emulation, and file transfer capabilities to users. Each communications tool provides the application with a specific communications function; for example, the VT102<sup>s</sup> Terminal Emulation Tool provides applications with VT102 terminal emulation capabilities. Therearethreetypesofcommunicationstools:connection tools, terminal emulation tools, and file transfer tools.

Connection tools define the type of connection that is established between a Macintoshand another computer. Terminal emulation tools determine the typeofterminalaMacintosh computeremulatesduringthe communicationssession.File transfertoolsimplementthe protocolusedtoensurethatfiles aretransferredintact.

Containspopularterminal emulation, file transfer, and connection tools	<ul> <li>Provides Macintoshapplications that support the Macintosh Communications Toolbox with basic functionality for communi- cating and exchanging data with other computers.</li> </ul>
<ul> <li>Intuitive, consistent user interfaces for accessing and setting up networks and services</li> </ul>	Allowsuserstoselect and configure communicationstoolseasilyacrossall Communications Toolboxapplications.
Open, modular, extensible design	<ul> <li>Enables users to add new functionality to applications.</li> <li>Allows developers to create new tools supporting other communications environments.</li> </ul>

# **Product Details**

Macintosh Communications Toolbox

The Macintosh Communications Toolboxissystemsoftwarethat provides applications with standard accesstocommunicationsservices, including connection, terminal emulation, and file transfer protocols. An integral part of Macintoshsystemsoftware, the **MacintoshCommunications** Toolboxconsistsoffourkev managers:theConnection Manager, Terminal Manager, File TransferManager, and CommunicationsResourceManager.These managersworktogetherwiththe communicationstoolscreatedby Appleandothercompaniesto provide applications with standard communications functions. The Macintosh Communications Toolboxalsomakescommunicationscapabilitiesmucheasierfor peopletousebecauseall applications written according to its standard will provide the same, familiarMacintoshlookandfeel. The Apple Modem and Serial Connection Tools support any NuBus<sup>s</sup> communications devices (suchasserialormodemcards) that are registered with the CommunicationsResource ManageroftheMacintosh CommunicationsToolbox.The selectionandoperationofthese cards are controlled through the appropriate connection tool setup dialogboxes.

Basic Connectivity Set of Tools The Basic Connectivity Set includes the following terminal emulation, file transfer, and connection tools:

Teletype(TTY) *TerminalTool* • Foremulatingabasic, fixedfunction terminal.

VT102TerminalTool

• Foremulatingastandard Digital Equipment Corporation text-onlyterminal. Provides fullfeatured DEC®VT102 terminal emulation except for local printer control. Includes intuitive Macintoshinterface foreasy configuration. Supports doublehigh, double-wide characters and bold and blinking text.

TextFileTransferTool Providesabasicwaytosend ASCIItextfiles.Allowsspecification of intercharacter and interline delay.

XMODEMFileTransferTool · Filetransfermethodthat includeserror-checkingand correction.Alsosupports XMODEMvariationmethods: MacBinary,MacTerminal1.1, StraightXMODEM,andXMODEM Text.Includesthesetransfer options:CRC-16,1Kblocks, CleanLink. SerialConnectionTool · Primarilyfordirectasynchronousconnectionbetween computers.Providesaccessto built-in serial ports and all serial cards that are registered with the Communications Resource Managerof the Communications Toolbox.

--Transmission speed: 50 to 57,600 baud

--Character length: 5 to 8 data bits; 1, 1.5, 2 stop bits --Parity: even, odd, none --Handshake: XON/XOFF, DTR and CTS, DTR only, CTS only, none

#### Apple Modern Connection Tool

Forestablishingaconnection through any Apple Modemor otherHayes-compatiblemodem attached to all registered Macintosh serial ports. Provides access to allserialandmodemcardsthat support the Communications ResourceManagerofthe CommunicationsToolbox. --Transmission speed: 110 to 57.600baud --Characterlength:5to8data bits; 1, 1.5, 2stopbits --Parity: even, odd, none -Handshake:XON/XOFF,none AppleTalk<sup>®</sup>ADSP

Connection Tool • Forestablishing a connection to another computer on an Apple Talk internet using the Apple Talk ADSP protocol. Requires Apple Talk network connection (for example, Local Talk®, Ether Talk®, or Token Talk®), and ADSP driver version 1.0.2 or later installed in System Folder. Other Tools *VT320<sup>s</sup> Terminal Tool* • Foremulating DECtext terminal that offers additional functionality, including support for international character sets and function and editing keys. Also includes support for downloadable

### LATConnection Tool

charactersets.

 ForestablishingaccesstoLAT (LocalAreaTransport),aDEC proprietaryprotocoldesignedfor efficient handling of terminal traffic over Ethernet networks. It is the recognized method for networkbased connections of terminals to VAXsystems

### Communications Tools for the Macintosh Communications Toolbox

SystemRequirements	<ul> <li>Macintoshsystemsoftware version 6.0.4 (or later)</li> <li>AMacintosh Plus, Macintosh SE or SE/30, or any Macintosh II computer with at least 1 megabyte of memory (2MB recommended)</li> <li>In addition to the above system requirements, you'll need the following for specific connection tools:</li> </ul>	<ul> <li>AppleModemConnection Tool: An Applemodemorother Hayes-compatiblemodemand appropriatecable</li> <li>SerialConnection Tool: Appropriate cabling to attach a Macintoshto another computer AppleTalkADSP</li> <li>Connection Tool: AppleTalk network connection (for example, LocalTalk, EtherTalkorTokenTalk)</li> </ul>	and ADSP driverversion 1.0.2 or laterinstalled in System Folder • LAT Connection Tool: Requires an Ethemetconnection and LAT drivers installed in System Folder
Availability	The Communications Toolsforthe Macintosh Communications Toolbox are available through APDA <sup>š</sup> and Developer Tools Express:	APDA(AppleProgrammersand DevelopersAssociation)and DeveloperToolsExpress AppleComputer, Inc. 20525MarianiAvenue, M/S33G Cupertino, CA95014-6299U.SA (800)282-2732(U.S.A) (800)637-0029(Canada) (408)562-3910(International) AppleLink®APDA	NOTE: Youwillneedalicense for commercial or site distribution of these tools and the accompanying user documentation.
