

Instructions for Installing *Complete Undelete*

Install *Complete Undelete*

1. Copy *Complete Undelete* into the System Folder on your startup hard disk drive.

Activate *Complete Undelete*

1. Open the Control Panel and select the *Complete Undelete* icon (or simply restart the Macintosh). Once activated, *Complete Undelete* automatically installs Delete-Logs on your disks as they are needed and logs every file that is deleted.

Optional Manually Log

1. For hard disks, you may prefer to manually install the Delete-Log in order to customize its size. Click on the *Install Log* button.
