"Getting Started" Read Me

This folder has been created to help you easily and effectively access the information on the Apple Reference & Presentations Library CD.

The "Getting Started" folder contains the following:

CD-ROM Setup: To access your CD-ROM drive, the CD-ROM software must be installed on the startup drive. This folder contains the latest version of this software and instructions on how to use it.

HyperCard 2.1: The Apple Reference & Presentations Library CD front-end stack has been created in HyperCard 2.1. To be sure you have HyperCard 2.1, follow the steps below:

1) Remove all previous versions of HyperCard and Home cards on all working drives;
2) Double click on the file HyperCard 2.1.sea;
3) A dialog box will appear asking you which drive you want to save the self-extracting HyperCard 2.1 file to;
4) Select the drive and click ok.

The HyperCard 2.1.sea file contains the following information:

1) HyperCard 2.1
2) Home Stack
3) HyperCard fonts
4) HyperCard Release Notes

Apple Garamond: This is the new Apple corporate font. It includes the TrueType fonts, the screen fonts, and the PostScript fonts. This font is needed to view and print the Apple Product Datasheets found within the Apple Literature Guide.

Other Fonts: Helvetica Condensed, Times are also available. These fonts, including Apple Garamond, should be loaded into the system on the startup drive. Font/DA Mover is automatically launched when the screen font file is double clicked.

If you are using system 6.0.X, use Font/DA Mover to install the screen fonts, If you are using System 7.0, simply draf the font suitcase files into your system folder.
