

Introducing Ourselves...

We are one of the area's largest construction companies specializing in the design, construction, and landscaping of mall structures. Whenever you're planning a new mall, or an extension to an existing mall, you should think of us. Here's why we think you should give us the assignment.

We built a total of more than 10 million square feet of mall space in the last five years. We know what we're doing. Here's a sampling of the structures we built:

- * Sun decks
- * Pedestrian plazas
- * Fountains
- * Parking garages
- * Fast-food restaurants
- * Shopping malls

Our construction division has also added freestanding buildings, parking complexes, and extensions to existing malls, including the restaurant-bridge over an eight-lane divided highway.

Our interiors division has created retail space for more than 56 retail merchants, including:

- * Alarm stores
- * Factory clothing outlets
- * Oil change garages
- * Department stores
- * Video rental libraries
- * 24-hour groceries
- * Copy centers

One developer has praised our work for the high quality:

"Your crews finished a complex job requiring lots of coordination of many different building trades and specialties, on schedule and within budget. I wish all our jobs were this easy.

"Working with you was satisfactory in every way. Even our accountant was pleased."
