Merge error: Expecting =, >, <, >=, ≥, <=, ≤, <>, or ≠.

Merge error: An IF instruction isn't matched by an ENDIF instruction.

Merge error: An ELSE instruction isn't matched by an IF instruction.

Merge error: An ENDIF instruction isn't matched by an IF instruction.

Merge error: Document can't be found, is the wrong type or is already being used in the merge.

Merge error: Expecting =.

Merge error: Unrecognized field name. It may be misspelled.

A file with that name already exists. Delete it?

Too many files open. Close a document to complete that operation.

The document or dictionary is in use by someone else. Only locked files may be used simultaneously.

Out of memory!! Your last change will be undone and all open documents will be saved before exiting.

This operation cannot be completed because a resulting paragraph would be too tall.

This operation cannot be completed because a picture, paragraph, clipboard or document is too large.

An error occurred while reading or writing the disk. Your disk or disk drive may be malfunctioning.

Unexpected error #^1 occurred while reading or writing the disk.

No guesses.

Are you sure you want to change the page wrap factor?

This operation will delete a header, footer, or footnote marker.

Quit and stop background printing?

The page wrap factor or binding margins are too large.

There are too many files on your disk to create a new document.

To cancel, hold down ⌘ and type period (.).

Choosing Tall Adjusted in Page Setup would allow background printing.

There is not enough memory to save the Clipboard.

There is no tab stop to indent to.

Reclaiming space in documents...

To cancel printing hold down the ⌘ key and type period (.).

Text near the edge of the paper may not have printed. Choose Show Space to see the page rectangle.

Your document can't be printed. Make sure AppleTalk is installed and a printer is chosen.

There isn't enough free space on your disk to print this document.

Checking document format...

You can't update the dictionary because its file, folder, or disk is locked.

No more misspelled words were found.

There isn't enough room on your disk to save the contents of the Clipboard.

That operation can't be completed. The document, dictionary, folder, or disk is locked or not accessible.

You can't insert text containing header, footer, or footnote definitions when not in document view.

You can't delete or replace a selection that spans more than one header, footer, or footnote.

Click in the current document before typing.

Text not found.

Do you want to insert a header or footer at the beginning of the document?

That operation can't be completed. Make sure a printer is installed and chosen.

An error occurred during printing. Check printer cables and printer installation.

The page size was previously set up for a different printer. Please do a Page Setup before printing.

There is not enough space on your disk for that operation.
