

# Internet Curriculum Connections

Bring the exciting resources of the Internet to your classroom and curriculum. This kit provides software and model lessons to help you access and find Internet content, distribute information, and conduct online communication and collaboration projects with students and teachers around the world. This kit can be purchased without a computer.

## Information Access

### **Ancient Civilizations: Greece and Rome Web Pack v1.0, Sunburst Communications**

Provides annotated links to web sites that students can use for exploration and research. Organizes sites by curriculum areas such as social studies, language arts, math, and science.

### **Encarta 98 Encyclopedia Deluxe Edition v1.0, Microsoft**

Contains thousands of multimedia articles, including video clips, animation, interactive activities, and 360-degree panoramas. Includes Internet links to information on each subject.

### **Scholastic Network, Scholastic**

Provides an online collection of resources that encourage effective classroom use of the Internet. Contains interactive projects and learning activities. Offers opportunities to communicate with well-known authors and scientists.

### **Online Researcher Powered by Electric Library v1.0, Infonautics**

Facilitates online Internet research by allowing queries in plain English. Searches for relevant information in newspapers, magazines, books, maps, and other works.

### **Internet the City v1.0, NetTaxi Online Communications**

Provides a guided tour of the Internet. Includes animated tutorials on Internet e-mail, search engines, the World Wide Web, Internet Relay Chat, and FTP.

## Information Distribution

### **DragNet v2.0, TikiSoft**

Organizes and stores collections of URLs in categories you designate. Stores URLs as bookmarks, organized in folders that can be copied onto student computers.

### **Myrmidon v2.0, Terry Morse Software**

Converts text documents into Internet HTML (Hypertext Markup Language) documents. Preserves formatting and style, and converts all Internet addresses to hyperlinks.

### **ClickBook v1.2, ForeFront Group**

Prints documents as booklets and brochures—even without a two-sided printer. Enables teachers to print web site content as booklets for use in class.

### **Web Buddy v1.1, DataViz**

Enables teachers or students to download web pages and organize the information collected for viewing offline.

## Communication and Collaboration

### **Hotline v1.2, Hotline Communications**

Facilitates live chatting and collaboration via the Internet. Enables you to host your own bulletin board. Includes both client and server software components.

### **Aspects v1.7a, Group Logic**

Enables students on networked computers (via local area network or the Internet) to write, paint, and draw in a collaborative environment.

### **ClearPhone v4.1, Engineering Consulting**

Provides videoconferencing over the Internet. Includes a shared whiteboard, e-mail, and file sharing between participants.

### **NetCard v1.0, PictureWorks Technology**

Creates e-mail postcards—with pictures, movies, and sounds—that can be viewed by other Macintosh users.

### **Internet Gateway v3.9, Vicom Technology**

Connects up to three simultaneous users to the Internet, using the same IP address. Also controls access to Internet sites, monitors user activity, and provides secure dial-in remote access to your network.

## Teacher Support Materials

This kit includes a Teacher's Guide offering model lessons, classroom management strategies, and exclusive online sites for creating and conducting collaborative projects. *Out of the Box and Onto the Net*, a resource booklet, is also included.
