

Read Me:

PowerSales™ has been compressed using Apple Quicktime 3™ and the Sorenson™ video codec. It should run perfectly on a G3 Macintosh™ or Intel Pentium II™ Computer. PowerSales™ should also run with no problem on Power PC™ computers running 180 MHz or faster.

\*Note: Make sure that your browser's Preferred ram setting is at least 35 megs.

For more information about PowerSales, please contact:  
Jay McCarthy

phone: 408-974-0794

email: [jmccarthy@apple.com](mailto:jmccarthy@apple.com)

Trouble Shooting: if the PowerSales Feb-99' alias gives you a password message, do the following:

- 1.) Scroll down in the window and find the file: seg1.html
- 2.) Click on this icon and PowerSales will launch ( the alias points to this file).
