Apple Web Page Construction Kit

This kit provides the tools required for web site development, as well as step-by-step instruction. The integrated suite of tools lets you design pages, create and edit graphics and sounds, make animations, and upload your finished pages to your web-hosting computer. Customizable instructions for workshop leaders are included, as well as links to web-based resources. This kit can be purchased without a computer.

Page Creator/Editor

Home Page v3.0, FileMaker
Helps students create dynamic web pages and whole web sites. Provides familiar tools, commands, and actions to format text, graphics, and page links. Includes web site uploading capability and access to an HTML editor.

Multimedia Tools

Web Painter v1.0, Totally Hip Software
Facilitates web page animations. Uses original or imported graphics. Imports images in popular graphics formats and exports them in GIF, Java, QuickTime, Sizzler, and other animation formats for the web. Provides a library of sample animations.

wwwART v1.0, Microfrontier
Helps students create and modify graphics for web pages. Uses existing images or their original graphics for backgrounds, buttons, banners, or other graphic elements. Opens TIFF, PICT, Photo CD, PostScript, Photoshop, MacPaint, and other formats and saves them in GIF or JPEG format.

**Kaboom! Special Edition,
Nova Development Corporation**
Enables students to combine, edit, and add special effects to the Kaboom! sounds. Provides a sound editor for working with original sounds and an extensive library of more than 500 ready-to-use sounds.

Clip Art

**Web Explosion! Special Edition,
Nova Development Corporation**
Provides a library of ready-to-use graphic elements. Offers more than 2,000 images, including standard web page elements such as buttons, bullets, banners, and backgrounds. Also provides a wide variety of clip-art images and photographs.

Browser

A web browser is included for viewing the CD-based instructional web site and the software documentation. The browser is also useful for previewing your web site as you assemble it in Home Page. And you can use the browser to visit the Apple Web Page Construction Kit Resource Page or any other site on the World Wide Web.

Teacher Support Materials

This kit includes a Teacher's Guide offering detailed information on installation and getting started using the software. Guides and manuals are provided electronically for the software in the kit when available. On the web, the Apple Web Page Construction Kit Resources web site provides links to web pages created by teachers and students.
