**Read Me:**

PowerSales™ has been edited & compressed using Apple Quicktime 4™, Final Cut Pro™, and the Sorenson™ video codec.  It should run perfectly on a G3 Macintosh™ or Intel Pentium II™ Computer.  PowerSales™ should also run with no problem on Power PC ™ computers running 180 MHz or faster.

*Note:  Make sure that the QuickTime application has at least 40 megs of memory, and your browser's has  35 megs.

**Download QuickTime 4™ from Apple's web site if you have problems running PowerSales with QuickTime 3™.

For more information about PowerSales, please contact:  Jay McCarthy

phone:  408-974-0794
email: jmccarthy@apple.com

Note:  If you click on the QuickTime, Terran, Sorenson, Apple, Final Cut Pro, or Electrifier Pro icons, your browser will open and you will be taken to the appropriate web site.  If you don't have enough ram set to your browser, this feature will not work.
