

The world's simplest OS now comes with something a bit more challenging.

When you upgrade your PowerPC™-based Macintosh® to Mac® OS 8.5, it's like getting a whole new computer. One that's more powerful and even easier to use, with features like Sherlock™, the Internet search detective. Just put in the CD, click the "install" button and you're in business. But if you really want a challenge, pick up Mac OS 8.5 between now and April 30th – we'll throw in a free copy of Tomb Raider® II or Tomb Raider Gold.
