

Elementary Desktop Tools

Designed to support exploration of any subject, this kit provides software that helps students learn through a combination of age-appropriate research materials and easy-to-use writing and painting tools that enable them to publish their findings in a variety of formats. Students can use the kit's materials to develop illustrated reports, newsletters, journals, multimedia presentations, and even web pages.

Productivity and Publishing Tools

HyperStudio v3.1, Roger Wagner Publishing

This multimedia authoring software enables students to create projects and presentations that include text, pictures, movies, animation, and sound easily and intuitively. With HyperStudio, no browser is needed to perform such sophisticated functions as importing and editing graphics and QuickTime movies or creating links to Internet sites.

Student Writing Center v1.0, TLC Multimedia

Students can use Student Writing Center for all kinds of writing projects, including reports, letters, journals, newsletters, and posters. This program combines full-featured word processing and easy desktop publishing with unique features designed to assist elementary learners in specific facets of writing.

Web Workshop v2.0, Sunburst Communications

Designed specifically to make creating pages for web sites (or your school's intranet) accessible to elementary students, Web Workshop offers easy access to a variety of appealing, interactive features. Students can enhance their own pages with sounds and graphics, as well as create links to other pages and sites.

Kid Pix Studio Deluxe v1.0, Broderbund Software

A multimedia authoring tool designed especially for young children, Kid Pix Studio Deluxe lets students paint pictures, create animations, stage puppet shows, and even add their own voices to their documents. They can create multimedia slide shows that integrate their own pictures, animations, movies, and sounds—even taking advantage of the program's text-to-speech functionality in both English and Spanish.

Research Tools

Grolier Multimedia Encyclopedia 1999, Mindscape

This comprehensive software package lets you put the combined resources of a 21-volume encyclopedia at your students' fingertips—a resource enhanced through the use of video and animation. It also includes search tools that allow students to explore pictures, video clips, sounds, interactive timelines, maps, and speeches.

Eyewitness Children's Encyclopedia v1.0, DK Multimedia

With this full-featured encyclopedia, young students can explore 3D environments such as rain forests and outer space. This extensive multimedia resource includes more than 3,000 articles and thousands of color photos, as well as a broad assortment of graphics, animations, and videos. The integrated 3D Navigator can be customized for each user.

Teacher Support Materials

This kit includes a Teacher's Guide that provides information on installing the software and getting started using it. Software user's guides are provided electronically when available.
