

Instructions for using Allegro 98's QuickStart Video Tips

1. Open the folder named "QuickStart Video Tips" on your Allegro 98 CD. Double click on the first Segment of the Video called, "1. Intro- Getting Started Fast".

2. Click the Play button, or double click any place on the open window.

Note: If you are using Apple's QuickTime version 3.0 and have an older, smaller computer monitor, the QuickStart Video may be larger than your screen, and you will have to double click on the on the open window to begin the video.

3. When you are done with the first segment of the QuickStart Video Tips, and you would like to view the next segment, select Open from the QuickTime Movie Player file menu. In the open dialog box, select your Allegro 98 CD and choose the next segment you would like to view from the QuickStart Video Tips folder.

Note: These video clips use Apple's QuickTime® extension and QuickTime Movie Player® Application. To view these Video tips the QuickTime extensions must be active, and you must have the Movie Player application.
