

Stencil Report Wizard Template

Opening the Stencil Report Wizard Template starts the Stencil Report Wizard. This wizard generates a Visio drawing of the masters on a selected stencil.

You can choose how many masters appear on a page, whether the page includes a header or footer, and whether to list each master's name and status bar prompt. If you want a paper copy of the master list, you can print the drawing.

You can also run the wizard by choosing Tools > Macro > Visio Extras > Stencil Report Wizard.
