Copyrights

JSB SOFTWARE LICENCE

1. GRANT OF LICENCE

In consideration of payment of the LICENCE fee which is a part of the price you paid for this product, and your agreement to abide by the terms and conditions of this Licence and the Limited Warranty, JSB, as Licensor, grants to you the LICENSEE (the individual or entity whose name and address appears on the Registration Form completed for this copy of software), a non-exclusive right to use and display this copy of a JSB software program (hereinafter the "SOFTWARE") on a single Computer (i.e. with a single CPU) designated by you on the Licence Registration Form at a single location so long as you comply with the terms of this Licence. If the single computer on which you use the SOFTWARE is a multi-user system, the Licence covers the number of users specified in accompanying written materials without further Licence payments. JSB reserves all rights not expressly granted to

the Licensee.

2. OWNERSHIP OF SOFTWARE

As the Licensee, you own the magnetic or other physical media on which the SOFTWARE is originally or subsequently recorded or fixed, but an express condition of this Licence is that JSB retains title and ownership of the SOFTWARE recorded on the original media copy(ies) and all subsequent copies of the SOFTWARE, regardless of the form or media in or on which the original and other copies may exist. This Licence is not a sale of the original SOFTWARE or any copy.

3. COPY RESTRICTION

This SOFTWARE and the accompanying written materials are the subject of copyright. Unauthorized copying of the SOFTWARE, including SOFTWARE which has been modified, merged, or included with other software, or of the written materials is expressly forbidden. You may be held legally responsible for any copyright infringement which is caused or encouraged by your failure to abide by the terms of this Licence.

Subject to the restrictions above, and if the SOFTWARE is not copy-protected, you may make one (1) copy of the SOFTWARE solely for back up purposes. You must reproduce and include the copyright notice on the backup copy.

4. USE RESTRICTIONS

As the Licensee, you may not use the SOFTWARE on more than one computer, or on multiple computers (processors) in a network, without a separate licence for each.

You may not electronically transfer the SOFTWARE from one computer to another over a network. You may not distribute copies of the SOFTWARE or accompanying written materials to others. You may not modify, adapt, translate, reverse engineer, disassemble or decompile the SOFTWARE except that you may decompile the SOFTWARE only to the extent permissible by law where this is indispensable to obtain the information necessary to achieve the interoperability of an independently created program with the SOFTWARE or with another program and such information is not readily available from JSB or elsewhere. You may not modify, adapt, translate or create derivative works based on the written materials without the prior written consent of JSB.

5. TRANSFER RESTRICTIONS

This SOFTWARE is licensed only to you, the Licensee, and may not be transferred to anyone without the prior written consent of JSB. Any authorized transfer of the SOFTWARE shall be bound by the terms and conditions of this Licence and Limited Warranty. In no event may you transfer, assign, rent, lease, sell or otherwise dispose of the SOFTWARE on a temporary or permanent basis except as expressly provided herein.

6. COPYRIGHTS, TRADEMARK NOTICES, LEGEND AND LOGOS

The SOFTWARE and written materials, logos, product names and other support materials, if any, are either patented, copyrighted, trademarked, tradename or otherwise proprietary to JSB or its suppliers. You agree never to remove any such notices and product identification.

7. TERMINATION

This Licence is effective until terminated. This Licence will terminate automatically without notice from JSB if you fail to comply with any provision of this Licence or if you become bankrupt, go into liquidation, suffer or make any winding up petition, make an arrangement with your creditors, have an administrator, administrative receiver or receiver appointed or suffer or file any similar action in consequence of debt. Upon termination you shall destroy the written materials and all copies of the SOFTWARE, including modified copies, if any. Upon termination there will be no refund of any monies or other consideration paid by you.

8. UPGRADE POLICY

JSB may create, from time to time, updated versions of the SOFTWARE. JSB will only make such upgrades available to Licensees and transferees who have returned the Licence Registration Form and paid any upgrade fee.

9. MISCELLANEOUS

This Licence shall be governed and construed in accordance with the laws of England and shall benefit JSB, its successors and assigns.

Using octal values to specify escape sequences

When using an octal value followed by a numeric character, it is advisable to specify the octal value for the numeric as well. This will prevent any ambiguities that may arise when parsing the sequence.

Example:

\0013 - This sequence should be interpreted as octal value \001 followed by the numeric value '3' and not the octal value 0013.

To ensure the sequence is interpreted correctly, it should be entered as: \001\063

Active URLs dialog

Check to highlight `http://` URLs which will load the specified web address in the default web browser.
Shade check box to use System Wide Settings.
Clear check box to not search for this URL type.

Check to highlight `file:///` URLs which will execute the specified file.
Shade check box to use System Wide Settings.
Clear check box to not search for this URL type.

Check to highlight `ftp://` URLs which will start File Transfer and enable you to login to the specified remote system.
Shade check box to use System Wide Settings.
Clear check box to not search for this URL type.

Check to highlight `mailto:` URLs which will start Mail and open a new message with the recipient's mail address in the To field.
Shade check box to use System Wide Settings.
Clear check box to not search for this URL type.

Check to highlight `news` : URLs which will open the specified news group within the web browser.
Shade check box to use System Wide Settings.
Clear check box to not search for this URL type.

Check to highlight `gopher:` URLs which will open the specified gopher group within the web browser.
Shade check box to use System Wide Settings.
Clear check box to not search for this URL type.

Check to highlight `telnet://` URLs which will connect using telnet to the specified remote system using a terminal emulator.
Shade check box to use System Wide Settings.
Clear check box to not search for this URL type.

Check to use Active URLs in the current terminal emulator.

Select whether the specified rules apply to the current terminal emulator only or to all terminal emulators (System Wide Settings) which are using Active URLs.

Click this button to save the rules used only by the terminal emulator in a `.zzt` configuration file.

Click this button to locate and open a `.zzr` configuration file containing saved rules.

Click this button to set a text foreground color to be used to highlight the active URL.

Click this button to set a text background color to be used to highlight the active URL

Shows how active URLs will be displayed in the terminal emulator.

Click this button to configure additional URL rules.

Advanced Active URLs dialog

Moves the currently selected rule up one position in the rules list.

Moves the currently selected rule down one position in the rules list.

Deletes the currently selected rule.

Adds a new rule to the top of the rules list. If a rule is currently selected, the new rule will be added just below it.

Displays all defined rules.

Displays all defined rules. Double click either part of a rule and click the  button to select a rule argument. Refer to the Technical Reference for full details on how to define rules.

Check to also search the System Advanced rules defined in the System Wide Settings.
