It seems that there is no link to download several plugins.

There are several 3rd party plugins (or official) that there is no link available in Hackman's Official Home page. To obtain them do one of the following:

a) Visit Plugins Center (http://members.xoom.com/TechAdmin) or Help|Hackman on the Web| Plugins center.
b) Contact directly the author(s) of the plugin.
c) Use live update, if there is somewhere on the web, it's probably in Live Update too.

If nothing of the above seems to work, the plugin may be unavailable or not available anymore or you may not have the right to obtain it (for beta testers or developers only).
