I found a bug. What should I do?

Do you have the latest release?
i) Check live update. Does it say that you have latest software release? If yes the proceed with step ii. Otherwise, use live update to get latest patches and updates.
ii) Check our web site http://members.tripod.com/~techmasters/ and read release notes for your version if available. If you see that we are aware of the bug that you've found then please be patient and wait for next update.

No need to panic.
You should note if this bug appears **every time** you repeat certain actions. Tell them to us and try to describe it as much as possible. You should also give us information about the exact version of your operating system ex. Windows 95 OSR 2 build 1111, US version.

Go to our web site

　　　　　http://members.tripod.com/~techmasters/

and click on feedback. You should fill the form following the guidelines above. Oh, thanx for your interest once again!
