- *Netscape Navigator*

New Features

Quick View Plus lets companies realize the full value of their technology investments. This version includes:

- ⇒ **Adobe Acrobat Reader** -- integrated installation and distribution of this popular plug-in
- ⇒ **SMS-enabled client installs** -- takes installation burden off I/S staff
- ⇒ **Scripted installs** -- provides I/S with more installation flexibility
- ⇒ **Font Sizing:** improves document legibility
- ⇒ **Spreadsheet column controls and printing options** -- allows users to resize column widths and scale and fit to page for printing

Quick View Plus Features:

With Quick View Plus, corporations can realize their technology investments while ensuring that their employees have immediate access to business-critical information. With QVP, employees can access and work with more than 200 Windows, DOS, Macintosh and Internet formats – regardless of whether or not they have the native application. QVP eliminates the barriers created by disparate platforms, formats and software versions. Quick View Plus lets employees work effortlessly with files or parts of files created in the format of text, spreadsheets, databases, presentations and graphics. Employees can:

- View and print files
- Copy and paste with full formatting
- Resize fonts in non-native applications
- Resize spreadsheet columns
- Scale and fit-to-page spreadsheet printing
- Zoom and rotate graphics
- Transfer files and data among Windows, Macintosh and DOS programs
- View, decompress and save individual files from archives
- View embedded objects created through object linking and embedding (OLE)
- Use Netscape plug-ins to view certain file types within the Quick View Plus view window using convenient context menu access

QVP makes these features available with files already on company computers or with files downloaded, received or copied from these sources:

- Internet
- E-mail
- Networks
- Bulletin boards

Quick View Plus integrates seamlessly into Windows 98, Windows 95, Windows NT 4.0, numerous Windows programs, and the most popular World Wide Web browsers and e-mail programs.

How Quick View Plus Adds Value:

Communicate freely across the enterprise.

Quick View Plus virtually eliminates the barriers created by disparate platforms, formats and software versions. Quite simply, Quick View Plus is the fastest and easiest way to find, access, view and print virtually any document -- even if you don't have the native application on your system.

Rapid-information exchange.

Quick View Plus lets you instantly see files and attachments just as they were created in the original applications. With Quick View Plus, you get the highest fidelity view available, with all important page-level attributes intact, including columns, headers/footers, page numbers, footnotes—even embedded graphics and OLE objects. Quick View Plus also supports hyperlinked documents, so you can instantly look at important related files.

Platform independence.

Quick View Plus enables you to see and work with more than 200 Windows, DOS, Macintosh and Internet formats. The wide variety of formats include text, spreadsheet, graphic, database, presentation and compressed files including PKZIP, as well as HTML, UUE and even the newest formats, including Word97, Excel97, PowerPoint97, Freelance97, Word Pro 96/97 and Lotus 1-2-3 97. With Quick View Plus you can access the information you need quickly, without having to worry about the format in which it was created. There's never a need to toggle to another application or to waste precious RAM running applications in the background just to look at files and attachments. You save time, money and disk space.
