Whenever you're ready, we've reserved a copy of *Arts & Letters EXPRESS* for you for the next 30 days at a special introductory price of only \$250.

Discover how easy it is to use Arts & Letters Draw and then step up to the top of the line of Arts & Letters graphics products. *Arts & Letters EXPRESS* comes complete with over 10,000 clip-art images, 91 typefaces, powerful drawing and editing tools, greeting cards, calendars, templates, and dozens of other features. Click on the Express Features button above to print a list of features.

In laboratory tests conducted by Mikrodatorn (May 94), the largest and most influential computer magazine in Sweden, Arts & Letters was ranked #1 in ease-of-use and performance vs. CorelDraw 4.0 and 5.0. For example, in total time to print the same page, Arts & Letters was over twice as fast as CorelDraw (4.0 and 5.0).

Also included is a Step-by-Step multimedia tutorial on CD-ROM. Experienced artists and designers will show you how to create stunning graphics in minutes. And we'll include a Logo Collection and Design Guide with tips on designing your own logo, stationery and business cards.

Award-Winning Computer Graphics

Arts & Letters EXPRESS the top of the Arts & Letters line. It includes over 10,000 award-winning clip-art images organized in over 170 libraries and 91 scaleable typefaces. Among the 170 libraries are Aircraft, Cartoons, Computers, Fantasy, Flags, Holidays & Seasons, Landmarks & Historic Sites, Maps, Musical Instruments, Nature, People, Religion, Science Fiction, Signs, Space, Sports & Recreation, and Transportation. The Clip-Art Manager displays previews of each image and provides a keyword search feature.

Pushpins allow dialog boxes to be kept on-screen during editing sessions. Assign attributes by selecting from visual palettes of fills and line styles.

The Color Filters feature allows you to adjust the colors of all objects in a file -- or just a few -- without breaking apart the objects: convert to grayscale, replace hue, add/remove (mix) paint are just a few of the controls.

Extrude and Warp/Perspective allow you to simulate two-point perspective and three-dimensional effects automatically. Hole-cutting allows backgrounds to show through objects. Autotrace automatically transforms bitmaps (scanned images) into editable objects.

Additional advanced features include masking and polymorphic tweening. A dynamically-updated Hint line displays options and identifies tools and commands. An on-line glossary and keyword search facility provide instant answers to any questions. Sophisticated editing tools, construction toolbox for precise drawing, line-to-curve conversion, and 4-color separations make *Arts & Letters EXPRESS* the equal of any graphic arts task.
