

Diligence Encounter97 for Windows

Read me - file

B4 Beta **June, 8th 1997**

Thank you for your decision to use Diligence Encounter97.

This is an early Beta release, so some bugs may occur.

Please read the following:

Portions of the software contain Beta or pre-release code. This code is by far not at the level of performance and compatibility of the final version. The beta may not operate correctly and may be substantially modified prior to commercial shipment.

NO WARRANTIES!!! We expressly disclaim any warranty for the software. This software or its related documentation is provided "as is" without warranty of any kind, either express or implied. The entire risk arising out of use remains with you.

Diligence Encounter97 is a totally free product! You don't have to pay anything to use it. -

But remember the following: The author is a 'poor' student and gets no revenues of his software. He wants to study in the United States which - as you might know - is rather expensive. So he'd really like to get some kind of assistance from users who really like the software and want it to be completed. Please send donations (all over 1\$ is will be taken with pleasure) to the address below.

Checks and cash money are welcome. Mail ulfw@hotmail.com if you'd like to help (or send money) on another way.

Thank you so much for your assistance.

Contents:

- 1. System requirements**
- 2. How to install Diligence Encounter97 for Windows**
- 3. Known Bugs - Please don't report**

1. System requirements

Minimum requirement:

At least an 486 processor, 8 MB RAM, 2 MB Hard Disk space, 32768 colors VGA - Graphics Adapter, a Windows -compatible sound card, Microsoft Windows 95 or Microsoft Windows NT 4.x.

Recommended:

Pentium 150 or higher, VESA Local Bus or PCI, 32 MB RAM or more, 2 GB Hard Disk, 32 Bit SVGA - Accelerator Graphics Adapter, 16 bit Windows - compatible sound card, Microsoft Windows 95 or Microsoft Windows NT 4.x.

2. How to install Diligence Encounter97 for Windows

Click on the *Start* button on the taskbar and select *Settings/Control Panel*. There click on the *Add/Remove Programs* icon. Click on the *Install...* button. Just click *Next*, after thst *Finish* and you are starting the Diligence Encounter97 Setup program. Now follow the instructions on the screen.

3. Known bugs and limitations - Please don't report

Please don't report the bugs or limitations mentioned here - Thank you.

1. Drag and Drop is not completely supported.
2. You cannot save AVI and RAW data yet, nor can you open RAW data - sorry.
3. This version of Encounter97 rarely throws Exceptions. Message boxes telling an *handled exception occurred. Please restart Encounter.* (or something similar) can be ignored. This is just for some debugging reasons! Encounter will work reliable after those exceptions though telling something else. This will be fixed in final beta releases.
4. Not all functions really work, e.g. *Paste Empty Space, Encounter97 Projects, Copy/Paste to/from file* and some more.
5. Open and Play functions will hang the system, when trying to run Encounter97 on a computer without sound board.
6. No help is available right now. Because Encounter97 is still in an early beta stage in which functions can still change slightly - help files are not very useful for future (final) versions. Sorry. If you have questions concerning how to use Encounter97 check out <http://support.home.ml.org>
7. Sometimes, when you click on the "Active Windows" button when the button is already clicked and the pull-down menu active, the button "pops up" (the arrow points back upwards) but the menu remains down.
8. Sometimes the "Tips" dialog at start-up prints an empty tip.

Please do report all bugs found and report what you like/dislike or ideas you have how to improve Encounter97. Thank you for your assistance.
