

# Welcome To Contact Help

Thanks for trying the Contact Management program.

First I make no warranties that this will work on your machine and am not responsible for any lost time or data that results from the use of this program. This program is presented as is without any guarantees of any kind. This program is BETA!

This program is distributed as is. A program with more features is being worked on but public release is pending on the results of the release of this software.

This program is not limited in any way. Any additional functionality (.i.e. a better help file <g>) is pending on YOUR support.

I might have a version that allows you to enter in your company, track different patients/caregivers available in the future if there is enough interest. Also some improved reports might be forthcoming. There are no bombs in the program (i.e. pay me or you can't get your data). So you actually have as long as it takes to evaluate it, but if your are using it for >30 days you should pay.

Installation is simple, just unzip all the files in the archive with the version you want

**Contact16.zip** (for Win 3.x) or **Contact32.ZIP** (for Win 95/NT) into a directory and add it to your programs.

## FILE

**Printer Setup**-Allows selection of the printer for reports <g>

**Default Font**- Allows you to change the default font on the screens

**Browse**-This menu allows you to enter the data.

## **REPORTS**

I'll add printing of weekly/monthly calendars if there is a demand.

If you find a problem send me mail, maybe I'll fix it.

If you don't know what something is click on it and try it out.  
Good Luck.
