

Accessing Draw mode

Choose Create - Drawing to access Draw mode.

If no frame is selected, Word Pro creates a frame. Draw appears in the menu bar and the Drawing Tools icons and the Drawing Actions icons display.

To access Draw mode after you have created a drawing, double-click the frame that contains the drawing.

Overview: Drawing

You can use Drawing to create and edit an object-based picture that consists of lines, arcs, ellipses, and rectangles. The picture can be in a frame in the main document text, a header or footer, a table, or parallel columns.

When you use Drawing, Word Pro automatically changes to Draw mode and displays Drawing Tools icons and Drawing Actions icons. There is no keyboard interface for Drawing. You must have a mouse.

In Draw mode, you can select objects in a picture, then copy and move them. You can change the size and shape of an object, and rotate and flip the object. Word Pro provides a variety of line styles, arrowheads, fill patterns, and colors that you can use to change the appearance of selected objects. In addition, you can specify the desired settings for a using a grid or rotating objects in a drawing.

Creating a drawing

You must create objects inside a frame to create a drawing. You can create a frame of the desired size before accessing Draw mode, or choose Create - Drawing and let Word Pro create the frame. You can use the rectangle, rounded rectangle, oval, line, and arc icons to create a drawing. To create freehand objects, you can use the polyline and polygon icons.

If you are in a text frame and you choose Create - Drawing, Word Pro creates a new frame for the drawing inside the text frame.

You can add text to the picture by creating a text object. You can specify the face, size, and color for the text in the current object and all future text objects you create. You can also copy text to the Clipboard and then paste it into a drawing.

Selecting objects in a drawing

It's important to remember that a drawing is a picture made up of objects--lines, polygons, arcs, text, and so on. You can modify any object in the drawing if you change to Draw mode and then select the desired object.

{button ,AL(^H_ACCESSING_DRAW_MODE_STEPS;H_DRAWING_TOOLS_BAR_OVER;H_DRAWING_ACTIONS_BAR_OVER;H_SELECTING_OBJECTS_IN_A_DRAWING_STEPS',0)} [See related topics](#)

Overview: Drawing Tools bar

Icon...	What it does...
	Displays the Draw InfoBox.
	Selects the draw objects.
	Crops the entire drawing.
	Draws a line.
	Draws a polyline.
	Draws a polygon.
	Draws a rectangle.
	Draws a rounded rectangle.
	Draws an oval.
	Draws an arc.
	Creates a draw-text object.

Modifying grid settings

You can specify the grid settings you want to use whenever you click the Grid command icon. Grid settings affect the entire frame, not just selected objects.

1. Click the right mouse button while in Draw mode.
2. Choose Draw Properties.

Tip

3. Click the Misc tab.

4. Select the desired grid setting.
5. Specify the distance between the dots or blocks of the grid.
6. If you want to align objects to the grid, select "Snap objects to grid."

{button ,AL(^H_SNAPPING_DRAW_OBJECTS_TO_THE_GRID_STEPS;H_MODIFYING_THE_DEGREE_AND_DIRECTION_OF_ROTATION_STEPS',0)} [See related topics](#)

Modifying the degree and direction of rotation

You can rotate an object up to 360 degrees clockwise or counterclockwise.

1. Click the right mouse button while in Draw mode.
2. Choose Draw Properties.

 Tip

3. Click the Misc Tab.
4. Specify the number of degrees you want an object to rotate each time you click the Rotate icon.
5. Select the direction you want an object to rotate.

{button ,AL(`H_MODIFYING_GRID_SETTINGS_STEPS;H_SNAPPING_DRAW_OBJECTS_TO_THE_GRID_STEPS'
,0)} [See related topics](#)

Modifying the shape of an object in a drawing

You can modify the shape of a rectangle, rounded rectangle, oval, or arc.

1. In Draw mode, double-click the object.
2. Place the mouse pointer on a black handle and then drag the handle in the direction where you want to move the line or side of the object.
3. Release the mouse button to stop modifying the object's shape.

{button ,AL('H_MODIFYING_THE_SHAPE_OF_A_POLYLINE_OR_POLYGON_STEPS;H_MOVING_AN_OBJECT_I
N_A_DRAWING_STEPS;H_SIZING_AN_OBJECT_IN_A_DRAWING_STEPS;H_DELETING_A_DRAWING_STE
PS',0)} [See related topics](#)

Modifying the shape of a polyline or polygon

You can modify the shape of a polyline or polygon by adding points to or deleting points from any line in the object.

1. Double-click the polyline or polygon.
2. To add points to a polyline or polygon, place the mouse pointer on any line in the object and then drag the line in the direction where you want to create a new point. Release the mouse button at the position where you want a new point to appear.

To delete points from a polyline or polygon, double-click the mouse button when the mouse pointer is on a black handle. Word Pro removes the black handle and redraws the line.

{button ,AL('H_MODIFYING_THE_SHAPE_OF_AN_OBJECT_IN_A_DRAWING_STEPS;H_CREATING_A_BEZIER_CURVE_STEPS;H_DELETING_A_DRAWING_STEPS',0)} [See related topics](#)

Moving an object in a drawing

1. In Draw mode, select one or more objects.
2. Place the mouse pointer on or inside the object and then drag the object to the desired position.
3. Release the mouse button.

{button ,AL('H_SELECTING_OBJECTS_IN_A_DRAWING_STEPS;H_SELECTING_ALL_OBJECTS_IN_A_DRAWING_STEPS;H_COPYING_AN_OBJECT_IN_A_DRAWING_STEPS;H_SIZING_AN_OBJECT_IN_A_DRAWING_STEPS;H_DELETING_A_DRAWING_STEPS;H_GROUPING_OBJECTS_IN_A_DRAWING_STEPS;H_UNGROUPING_OBJECTS_IN_A_DRAWING_STEPS',0)} [See related topics](#)

Rotating a draw object

1. In Draw mode, select one or more objects.
2. Choose Draw - Rotate.

The first time you access Draw mode, Rotate is set to 10 degrees clockwise.

Word Pro rotates the object the degree and direction specified on the Drawing Properties InfoBox Misc panel.

{button ,AL('H_ROTATING_A_DRAW_OBJECT_STEPS;H_ROTATING_A_DRAW_OBJECT_USING_THE_ROTATION_ARROWS_STEPS;H_FLIPPING_A_DRAW_OBJECT_FROM_SIDE_TO_SIDE_STEPS;H_FLIPPING_A_DRAW_OBJECT_FROM_TOP_TO_BOTTOM_STEPS',0)} [See related topics](#)

Rotating a draw object using the rotation arrows

1. In Draw mode, double-click the object.
2. Place the mouse pointer on a rotation arrow.
3. Drag the arrow in the direction you want to rotate the object.

{button ,AL('H_ROTATING_A_DRAW_OBJECT_STEPS;H_CHANGING_THE_CENTER_OF_ROTATION_STEPS;H_ROTATING_A_DRAW_OBJECT_USING_THE_ROTATION_ARROWS_STEPS;H_FLIPPING_A_DRAW_OBJECT_FROM_TOP_TO_BOTTOM_STEPS',0)} [See related topics](#)

Rotating text objects in a drawing using the InfoBox

1. Select the draw text object you want to rotate.
2. Click the right mouse button.
3. Choose Draw Properties.

Tip

4. Click the Fonts tab.

5. Specify the number of degrees you want to rotate the text.
You can only rotate text counterclockwise using the InfoBox.

{button ,AL('H_EDITING_A_TEXT_OBJECT_IN_A_DRAWING_STEPS;H_ROTATING_A_DRAW_OBJECT_STEPS;H_ROTATING_A_DRAW_OBJECT_USING_THE_ROTATION_ARROWS_STEPS;H_DRAWING_FONTS_PROPERTIES_CS;H_MODIFYING_THE_DEGREE_AND_DIRECTION_OF_ROTATION_STEPS',0)} [See related topics](#)

Details: Saving a drawing

File name

Type the drawing name in the "File name" box.

If you select the drive and folder, all the documents in the folder appear in the box.

Save file as type

Choose to save the entire drawing or only selected objects within the drawing.

Folders

Displays all the folders in a specific drive.

Drives

Displays all the drives in the system.

{button ,AL(`H_SAVING_A_DRAWING_STEPS',1)} [Go to procedure](#)

{button ,AL(`H_EXITING_DRAW_MODE_STEPS',0)} [See related topics](#)

Saving a drawing

1. In Draw mode, choose Draw - Save As Drawing.

2. Type a name for the drawing in the "File name" box.

3. If you want to save the entire drawing, select "Entire Drawing" from the "Save file as type" box.

4. Click OK.

Selecting adjacent objects in a drawing

1. In Draw mode, click the Select Draw Object icon.

2. Place the mouse pointer in one corner of the area where the objects are located and then click and drag the mouse across the desired objects.

Word Pro displays a rectangle as you move the mouse.

3. Release the mouse button.

Any objects that are even partially inside the rectangle when you release the mouse button are selected.

{button ,AL(^H_SELECTING_TWO_OR_MORE_OBJECTS_IN_A_DRAWING_STEPS;H_SELECTING_ALL_OBJECTS_IN_A_DRAWING_STEPS;H_DESELECTING_OBJECTS_IN_A_DRAWING_STEPS;H_MOVING_AN_OBJECT_IN_A_DRAWING_STEPS;H_COPYING_AN_OBJECT_IN_A_DRAWING_STEPS;H_SIZING_AN_OBJECT_IN_A_DRAWING_STEPS';0)} [See related topics](#)

Selecting all objects in a drawing

Click on the Select All icon or choose Draw - Select All to switch between selecting and deselecting all the objects in a drawing.

Word Pro displays black handles around all the objects.

```
{button ,AL(^H_SELECTING_TWO_OR_MORE_OBJECTS_IN_A_DRAWING_STEPS;H_DESELECTING_OBJECTS_IN_A_DRAWING_STEPS;H_MOVING_AN_OBJECT_IN_A_DRAWING_STEPS;H_COPYING_AN_OBJECT_IN_A_DRAWING_STEPS;H_SIZING_AN_OBJECT_IN_A_DRAWING_STEPS;H_DELETING_A_DRAWING_STEPS',0)} See related topics
```

Details: Selecting lines and colors

Word Pro only fills closed objects such as polygons, squares, and circles with the specified color and fill pattern.

Word Pro uses the pattern and color you specify for currently selected objects and any future objects you draw.

Word Pro only places arrowheads at the beginning or end of open objects, such as lines and arcs.

Line style

Allows you to select a line style.

Line color

Allows you to select a line color.

Fill color

Allows you to select a background color for the closed object.

Pattern

Lets you select from different types of background patterns.

Pattern color

Lets you select a background pattern color.

Arrowheads

Displays an arrowhead on one or both ends of the line.

{button ,AL(^H_SELECTING_LINES_AND_COLORS_STEPS',1)} [Go to procedure](#)

{button ,AL(^H_SELECTING_OBJECTS_IN_A_DRAWING_STEPS;H_SELECTING_TWO_OR_MORE_OBJECTS_I

TS_IN_A_DRAWING_STEPS',0)} [See related topics](#)

Selecting lines and colors

You can modify an object's line style and color, fill color, pattern and color, or line endings.

1. In Draw mode, select one or more objects.
2. Click the right mouse button and choose Draw Properties.

 Tip

3. Click the Lines & Colors tab.

4. Select the desired options.

{button ,AL(^H_SELECTING_LINES_AND_COLORS_DETAILS',1)} [See details](#)

{button ,AL(^H_SELECTING_OBJECTS_IN_A_DRAWING_STEPS;H_SELECTING_TWO_OR_MORE_OBJECTS_I
N_A_DRAWING_STEPS;H_SELECTING_ALL_OBJECTS_IN_A_DRAWING_STEPS;H_DESELECTING_OBJC
TS_IN_A_DRAWING_STEPS',0)} [See related topics](#)

Selecting objects in a drawing

1. In Draw mode, click the Select Draw Objects icon.
2. Click the desired object.

Tip

Word Pro displays black handles around the object.

```
{button ,AL(^H_SELECTING_TWO_OR_MORE_OBJECTS_IN_A_DRAWING_STEPS;H_SELECTING_ALL_OBJECTS_IN_A_DRAWING_STEPS;H_DESELECTING_OBJECTS_IN_A_DRAWING_STEPS;H_MOVING_AN_OBJECT_IN_A_DRAWING_STEPS;H_COPYING_AN_OBJECT_IN_A_DRAWING_STEPS;H_SIZING_AN_OBJECT_IN_A_DRAWING_STEPS',0)} See related topics
```

You can select an object that is totally hidden by another object. Press CTRL and click the top object until the desired object is selected.

Selecting two or more objects in a drawing

1. In Draw mode, click the Select Draw Objects icon.

2. Select the first object.

Tip

3. Press SHIFT and click the next object.
4. Repeat step 3 for each object you want to select.

Word Pro displays black handles around the objects.

{button ,AL(^H_SELECTING_ADJACENT_OBJECTS_IN_A_DRAWING_STEPS;H_SELECTING_ALL_OBJECTS_IN_A_DRAWING_STEPS;H_DESELECTING_OBJECTS_IN_A_DRAWING_STEPS;H_MOVING_AN_OBJECT_IN_A_DRAWING_STEPS;H_COPYING_AN_OBJECT_IN_A_DRAWING_STEPS;H_SIZING_AN_OBJECT_IN_A_DRAWING_STEPS',0)} [See related topics](#)

Sending an object back one layer

1. In Draw mode, select the object.
2. Choose Draw - Priority.
3. Choose Send back one.

{button ,AL('H_BRINGING_AN_OBJECT_TO_THE_FRONT_STEPS;H_SENDING_AN_OBJECT_TO_THE_BACK_STEPS;H_CHANGING_THE_CENTER_OF_ROTATION_STEPS;H_ROTATING_A_DRAW_OBJECT_USING_THE_ROTATION_ARROWS_STEPS;H_FLIPPING_A_DRAW_OBJECT_FROM_SIDE_TO_SIDE_STEPS;H_FLIPPING_A_DRAW_OBJECT_FROM_TOP_TO_BOTTOM_STEPS;H_MODIFYING_THE_DEGREE_AND_DIRECTION_OF_ROTATION_STEPS',0)} [See related topics](#)

Sending an object to the back

1. In Draw mode, select the object.
2. Choose Draw - Priority.
3. Choose Send to back.

{button ,AL(`H_BRINGING_AN_OBJECT_TO_THE_FRONT_STEPS;H_BRINGING_AN_OBJECT_FORWARD_ONE_LAYER_STEPS;H_SENDING_AN_OBJECT_TO_THE_BACK_STEPS;H_FLIPPING_A_DRAW_OBJECT_FROM_SIDE_TO_SIDE_STEPS;H_FLIPPING_A_DRAW_OBJECT_FROM_TOP_TO_BOTTOM_STEPS',0)} See related topics

Details: Sizing an object in a drawing

Drag a side handle to change the width of the object.

Drag a top or bottom handle to change the height of the object.

Drag a corner handle to change both the width and height of the object at the same time.

When you size a text object, Word Pro changes the point size and/or spacing of the text.

{button ,AL(`H_SIZING_AN_OBJECT_IN_A_DRAWING_STEPS',1)} [Go to procedure](#)
