

# **FUTURELOCK V2.0**

A very powerful and easy to user multi-user PC Protection System. Suitable for all types of Windows users especially where more than one person has access to a PC e.g. Education. Once installed you will have peace of mind that no one will corrupt or change your system. The package will also cater for blocking access to any programs, files or directories that you wish to keep hidden from different users.

## **What the press think of FutureLock**

*"A powerful security system designed for all Windows users and currently in use by business and education sector..If the correct password isn't entered, what can be done within Windows is highly restricted."*

### **PC Plus**

*"Protect your data from accidental or deliberate corruption with this password security system. FutureLock enables you to restrict access to sensitive files and program groups to only trusted users."*

### **Personal Computer World**
