

TC Trekwar is a 3D space game where, level after level, you shoot and destroy opposing alien ships. Later levels feature cloaking space ships. A good strategy is to use your phasers when you can actually make a hit. Otherwise use the guided photon torpedoes when you cannot reach with phasers. Attack only those ships that are actually shooting back. Other ships may not be able to hit you from their range.

Movement

Place the arrow at the edge of the window on the direction you to face or move.

Mouse Buttons

Left: Phasers

Right: Photons
