

Getting Started

Draw or Paint New image: <File> <New>
Prepare to Save First Image : <Drag From Main>
Load Animation Manager <Tools> <Animation Manager>
Drag Image to Animation Manager: <Drag From Main> <Drop n' Save >
Repeat the above altering each image or "frame" slightly.

Once you have completed the process and have a few frames, you can preview your animation and then load the frames into an AVI editor, or GIF editor, or any other format of your choice. An excellent free AVI editor called **AVIEdit** is available via link at our Web Site.

The CDROM Version of **Personal TV Studio** comes complete with all the tools you need to [create movies with sound, edit home videos and add special effects](#), [create Web TV Channels, make music videos](#), etc, in one organized multimedia development interface. Comes with examples. See address below for details.

You can order the CDROM by sending \$89.00 U.S. to

Rick Sobie
