

**Worksheet View**

View and analyze data in familiar spreadsheet-like tables. Flexibly tailor your worksheet with color, fonts, sizes and adjustable row and column widths.

**Worksheet Calculations**

Perform ad hoc calculations in any blank cell.

**Worksheet Panes**

Set horizontal and vertical panes for maximum control over scrolling when reviewing your data.

**Crosstab View**

Easily perform sophisticated data analysis. Drag and drop fields to define your desired crosstab. For example, you might review monthly sales by region.

**Crosstab Calculations**

Perform advanced crosstab analysis by obtaining the sum, count, average, standard deviation, minimum, maximum or variance of any cell, row or column.

**Charting**

Review and present your data with the benefit of graphics. Choose from 20 chart types including pie, bar, line and area. Each chart type offers 6 layout options for a total of 120 different looks.
