# Chapter 1 Installing The Hardware

## Overview

This chapter provides detailed procedures for installing:

- SCSI host adapters
- backup devices and termination blocks
- SCSI Device Drivers

If you have already installed your hardware, proceed to Chapter 2.

# Chapter 2  Server Setup and TSAs

## Overview

This chapter explains how to:

- update servers with the most recent NetWare modules
- load TSAs on servers and workstations
- create the auto login user (if necessary)
- tune your servers to ensure optimal performance

## Contents

# Chapter 3 Installing The Software

## Overview

This chapter provides instructions for:

- installing Backup Director software
- installing AutoLoader Software
- Installing Multi-Server Software

Before performing these procedures, be sure to review Chapter 2.

# Appendix A Installation Notes

## Contents

General Hardware Notes
- Adaptec 1540 Host Adapters
- Servers With More than 16MB of Memory
- Host Adapter Bios
- Tape Drive Cleaning
- 8500 Tape Drives

General Software Notes
- Resource Files
- NETWARE.DLL
- Multiple Server Environment
- Read Fault Emulation
- Auto Login user on NetWare 4.x Servers
- Time Zone Environment Variable
- Execute-Only attribute
- DOS TSA and SEND messages
- Search Mode
- Unloading TSAs
- NetWare Upgrades

Workstation TSA Options
- TSASMS Options
- TSAOS2.CFG Options
