

# **Corel PHOTO-PAINT 7 Plus Trial Version Readme**

## THANK YOU

Thank-you for evaluating the Corel PHOTO-PAINT 7 Plus 30-day trial version CD.

This fully functioning trial version will continue to operate for 30 days after the initial launch of the application. Once the 30 day trial period has expired an error window will appear, prompting you that the evaluation period has expired and the program will cease to function.

This trial version software allows you to explore the main application, Corel PHOTO-PAINT 7 Plus, but does not include supporting utilities which are part of the full version. To purchase a full version of Corel PHOTO-PAINT 7 Plus, please contact your local software reseller, or check out Corel's World Wide Web site at <http://www.corel.com> for more information.

**The full version of Corel PHOTO-PAINT 7 Plus includes:**

### **SUPPORTING UTILITIES:**

**Kodak Digital Science (TM)** Color Management System ensures accurate color representation during scanning, display and printing using ColorSync 2.0-compatible device profiles.

**Corel TEXTURE (TM)** is a powerful tool for creating realistic natural textures such as wood, marble, clouds, stone or metal. Every texture is defined by several material layers and custom lighting effects.

**Corel MULTIMEDIA MANAGER (TM)** a visual file management utility that helps users to easily organize and manage graphics files, or browse the extensive clipart, photo and floating objects libraries included in Corel PHOTO-PAINT 7 PLUS. The new Windows 95 Explorer-like interface makes this utility very intuitive to use.

**CorelSCAN (TM)** is a new wizard-based scanning utility with preset processing options. You may also save scanning settings for future use when scanning similar images. The user can apply automatic effects to the image during the scanning process including moire removal on halftoned images and red eye removal on color photographs.

**Corel CAPTURE (TM)** is an advanced screen capture utility that allows for captures of the Current Window, Active Client, Full Screen, Rectangular Area, Elliptical Area or Freehand Area. Hot keys, destination, filename, type and preference settings may be defined by the user. CAPTURE is ideal for the documentation specialist. Enhanced video capturing is included in Version 7.

**Corel SCRIPT Editor (TM) and Corel Script Dialog Editor:** are utilities that facilitate the creation of add-on utilities for CorelPHOTO-PAINT (TM) through OLE 2 Automation. For greater flexibility in script design, virtually every function has been exposed to automation..

### **PLUG-IN FILTERS:**

AutoF/X Photo/Graphic Edges

Cytopia Photolab (TM)

Digital Watermarking from Digimarc (TM) Corporation

Extensis Intellihance 2.0

Kai's Power Tools (R) 3.0 SE

Squizz! (TM)

### **LIBRARIES AND FONTS:**

CorelPHOTO-PAINT 7 PLUS includes an extensive collection of image libraries, textures and fonts to help users enhance their design:

1,300 photos

1,200 clipart images

1,000 floating objects

750 tiling textures

150 TrueType (R) fonts

75 brush textures

**CorelPRESS MANUAL:** "Corel PHOTO-PAINT 7 PLUS: The Official Users Guide", a third party book authored by David Huss (Osborne/McGraw-Hill, 672 pp.) and will be included in the package as added value.

In our continuing efforts to improve our software, we welcome your suggestions and comments. Please forward your comments and suggestions for improvement or any new functional requirements for any component of Corel PHOTO-PAINT 7 Plus (or the CorelDRAW line of products) to:

CorelDRAW Product Manager  
Corel Corporation

1600 Carling Avenue,  
Ottawa, Ontario, Canada  
K1Z 8R7

or by Fax at: (613) 728-9790

Attn: CorelDRAW Product Manager

or on Corel's Web site:

## Web Browsers and JPEG images

Please note that 32-Bit JPEG images are not currently supported in Web Browsers.

If you are saving Progressive JPEG images for the Web, make sure that your Web Designer and/or Browser supports Progressive JPEG.

---

## CorelTUTOR

If running CorelTUTOR in 256 color video mode, colors in document may be temporarily altered. This is simply a focus issue and will correct itself once focus returns to the application.

## Printing

### Printing Custom Page Sizes with the Adobe Postscript Driver

Documents printed on Custom Page Sizes have potential to output with a clipped image due to the rotation of the page when it is imaged on roll-fed media. This problem occurs with Level 1 and Level 2 PPD's for roll-fed devices on both the Macintosh and Windows platforms. As a work around, use a pre-defined page size or, if possible, a square Custom Page Size. e.g. 12"x12".

### HP Color LaserJet / HP Color LaserJet 5M Printer with Postscript Option

Quality color output of raster images may be improved by enabling the Output Bitmaps as RGB option in Postscript Preferences on the Print - Options - Options Tab.

## Video Display Problems

The Matrox Millennium video card may exhibit cursor problems in Corel PHOTO-PAINT 7 if using the animated cursors in Windows 95. This works fine in NT4.

The Number Nine Reality video card may exhibit problems in Corel PHOTO-PAINT 7. When using some of the tools that utilizes marques, screen dirt can appear which can be cleaned up by refreshing the screen.
