

Lotus Smartsuite Web Page Notes -

US smartsuite page - the html file is called "smartsuite.html" all the other files in this directory are picture files for this page.

The two German pages - the main index and the German Smartsuite product page are in a sub directory called "lotus german". The two files are;

"gerindex.html" - as the main German Lotus index page

"gersmart.html" - as the German Smartsuite product page.

Again all the other files in this directory are images for these pages.

Hope this is all okay, any problems give me a bell.

Luke
