

Thank you for your purchase from SlickTemplate Below is an explanation of the contents of your ZIP file.

Extras Included: Here you will find the clipart library included with your template, it is provided in two variants, a PSD file to be used with Adobe Photoshop, and a PNG file to be used with Macromedia Fireworks or other compatible editor.

Install Fonts: Here you will find a collection of free fonts that are included with every template. It is *required that you install* these fonts before proceeding to modify this template. (For installation instructions, please refer to SlickTemplate.com and then visit the link "CUSTOMIZING TUTORIALS")

Screenshots: Here you will find a set of screenshots of your template, one small and one large screenshot of every page included. The files are provided in JPG format.

Source Files: This directory contains the Source Files that are to be used to create your website from the template. There are a few options provided for customizing your template, outlined below:

- **Beginner Method** (*Average Results*)

This method is to be used if you do not have a compatible editor for your source files, such as Adobe Photoshop or Macromedia Fireworks. Please look inside the "Source Files > Beginner > Customize HTML Template" directory and you will find an HTML editable template of each page included with your template. You can edit these files in any HTML editor you prefer such as Adobe GoLive, Microsoft FrontPage, or the recommended Macromedia Dreamweaver.

- **Advanced Method** (*Best Graphical Results*)

If you have Adobe Photoshop, Macromedia Fireworks, or any other compatible graphic editor, please look inside the "Source Files > Advanced" directory to find your source files, a different file is provided for every page of your template. Files are provided in Adobe Photoshop ".PSD" and Macromedia Fireworks ".PNG" format. Compatible software: Adobe Photoshop 6 or higher, Fireworks MX or higher, older versions may work, but are not guaranteed.

- **Templates With Flash Animation** (*Not available with every template*)

If you have purchased a template that includes any Flash Animation, please look inside the "Source Source Files > Advanced > Flash Template" directory to find the available source files to be used in editing the Flash portion of your template. Files are provided in Flash ".FLA" format. *Please note some template may only require editing an accompanying TXT file for the text labels, such as the "Company Name" or menu buttons and links. Look for such a TXT file and edit that prior to editing your FLA source files, note not all templates include a txt file, in which case all the editing will be done in Flash. For more information and guided tutorials please visit the "Customizing Tutorials" section of SlickTemplate.com

View Template Demo: This directory contains a HTML example of the pages included with your template. The files are provided in HTML format to be opened using your web browser.

*It is **recommended** that you read all the tutorials and instructions if you have any doubts or questions about editing your template. For more information on customizing your templates, including Guided Tutorials, please visit following address: www.slicktemplate.com/tutorials/*
