WinNavigator v1.41

Powerful but easy-to use file manager -- a good replacement of
Windows Explorer or Norton Commander. Besides usual file management
(copy/move/delete etc), it contains built-in viewer for 9 most-popular
graphic formats, and 11 sound/music format, as well as video clips (
Microaoft AVI). In addition, it supports all compressed files like zip,
arj, rar etc (showing them as regular folders), has the SysInfo panel,
internet dialer, clipboard viewer, calculator, audio CD player, and
resource explorer. As a bonus, the program contains two simple games
(tetris-like one, and Life). Multi-language support is also there
(now available: English, Italian, Polish, Russian, Czech, Hungarian).

Features of WinNavigator:

* * 32-bit filemanager for Windows95/98, WindowsNT 4.0, Windows2000
* * Supported archivators: zip,arj,rar,arc,lha, cab, lha, tar, zoo, gzip, uue
