Unless you just downloaded this software from our web site or one of our mirror sites you should visit our web site for the latest version or, if you already have the software installed, click the "Check For Update" command on the Help menu.

A. ORDERING

The price is just $24.95 US for a single user license. You can order online by visiting http://www.camdevelopment.com/register.htm You can also order online or by US check/money order using the built-in order wizard on the introduction screen displayed when the software starts.

ALL ORDERING METHODS ARE COMPLETELY SECURE!

B. UPDATING/UPGRADING

This is a major upgrade from registered users of V6.x and older versions and a minor update for registered users of MPD 2000. If you are a registered user of V6.x or older you can upgrade for only $15.00 US by visiting http://www.camdevelopment.com/upgrade.htm You can also upgrade online or by US check/money order using the built-in order wizard on the introduction screen displayed when the software starts.

NOTE: All upgrade requests are verified manually. Upgrade pricing is only available to registered users. Please be sure to upgrade under the same name/company you originally ordered under.

Upgrading from V6.x

Install the new version to a different folder than your previous version (by default setup will do this). When you are happy with the new version you can uninstall your previous version.

If you are presented with the *Create New Diary* screen the first time you run the new version and you already have a diary file created you should select *Cancel* and choose *Browse* on the *Open Diary* screen to select your exisitng diary file. If you want to create a new diary file follow the steps on the *Create New Diary* screen.

When you open a V6.x diary for the first time a copy is made (with the extension .ddf.v6x) so you can revert to V6.x in case you do not want to upgrade. If you wish to revert to using V6.x instead of upgrading, you will need to rename the .ddf.v6x file to a .ddf file.

*** NOTE: Changes you make in the new version are NOT saved into the .ddf.bak file.

Address Book and To-Do entries will need to be exported from the old version as text files and imported to the new version, or may need to be re-entered.

Upgrading from V4.x or V5.x

You need the *Diary Conversion Wizard* to import entries from MPD V4.x and MPD V5.x. The DCW will take your individual entry files created by older versions of MPD and import them into the new format, single file diary used by the new version.

For a free copy of the Diary Conversion Wizard visit http://www.camdevelopment.com/mpd.htm
Please follow the conversion steps carefully.

1. SHAREWARE INFORMATION

THIS PRODUCT IS NOT FREE SOFTWARE. It is distributed as Shareware, which allows you to *try it before you buy it.* You may evaluate this product for 30 days. If you decide to continue using it, you are required to either register (purchase) it or remove it from your computer.

Shareware gives you the opportunity to fully evaluate a product before spending your hard earned money on it. We're sure you will find this product to be an excellent piece of software so please be honest and register if you continue to use it.

REGISTERED USERS ENJOY:

- Full unlimited registered access.
- Elimination of introduction screens.
- Priority technical support.
- Access to additional add-ins.
- Free minor version updates.
- E-mail notification of new versions and products.
- Special offerings.
- And much more...

To register just click the button on the introduction screen when you start the program to strat the built-in order wizard.

2. SYSTEM REQUIREMENTS

486 processor or better
Windows 95, 98 or NT 4.0 or later.
Common Controls V4.72 or later as provided with Internet Explorer 4.01 or later

3. INSTALLATION

To install, run the self-installing file.

Once installed please look through the on-line help for information on getting started quickly. We think you will find that the software is well designed, very easy to use and requires very little effort to master.

4. FREQUENTLY ASKED QUESTIONS

If you have any trouble using this software please look through the online help before calling or writing for assistance. There's detailed information on every aspect of the program and a section devoted to frequently asked questions.

To help you find the answers you need as fast as possible we've also posted the latest FAQ's on our web site at:

http://www.camdevelopment.com/mpd.htm

5. CONTACTING US

If you have a question *PLEASE* look through the online help and the FAQ section on the web site at:

http://www.camdevelopment.com/mpd.htm

These sources contain answers to many frequently asked questions and will provide you with answers as fast as possible.

If you cannot find the answer to your questions visit:
