

# VERITAS Backup Exec

## Desktop Pro™

VERITAS Backup Exec Desktop Pro allows multiple computers in a peer-to-peer network to be protected from a single machine.

### Advanced desktop data protection for small networks

VERITAS Backup Exec Desktop Pro™ protects your computer and peer-to-peer network data from the hazards of hard disk failure, power surges, flood, fire, theft and human error. It backs up and restores your data within a peer-to-peer network using the industry's leading removable media devices or network drive. With the Disaster Recovery feature, you can restore your system without first reloading your operating system or backup software. You can launch complete backups or data restores with the touch of a single button. The Automatic Protection feature guarantees regular, reliable protection with a built-in methodology. Backup Exec Desktop Pro simplifies data restoration with its File Find feature so you can quickly locate versions of specific files for restore. Its point-and-click scheduling system is the best way to ensure regular, reliable unattended backups.

#### Product Highlights

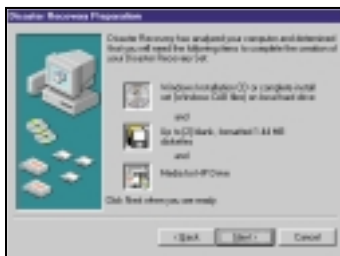

- Disaster Recovery rebuilds your system from a boot disk and your latest backup
- Peer-to-peer network data protection enables sharing of backup software and peripherals
- Perform unattended backup with user-defined scheduling flexibility
- Maximizes media efficiency by using hardware or software data compression

VERITAS Backup Exec Desktop Pro™ is a leading desktop data protection solution that provides award winning automation, ease of use, and reliability for Windows 95, Windows 98, Windows Millennium, Windows NT Workstation 4.0, and Windows 2000 Professional peer to peer networks.

A reliable backup system lays the foundation for properly securing data. VERITAS, The Data Availability Company™, is the industry leader in Windows, UNIX and NetWare backup. VERITAS has defined the data protection market by bringing well engineered, reliable and easy to use solutions to customers worldwide. Consequent to a core company value that calls for the replacement of excellent data management and protection solutions with even better ones, the VERITAS vision calls for further performance enhancements in the entire product line.

**Performance Engineered for Windows 98/95/Millennium, NT Workstation 4.0 and 2000 Professional.**

- Disaster recovery restores all your data and applications without having to first reinstall the operating system or backup software.
- Peer-to-peer network supports provides you an inexpensive way to share peripheral devices for backup and restore.
- Integrated and automated scheduling allows for unattended backup protection and enhanced functionality with third party schedulers.
- Automatic Protection safeguards your data with a built-in data protection methodology that automatically knows when to perform full and differential backups.
- Compression options provide significant savings on media.
- Scheduling of recurring operations with job-based backup sets allows you to initially establish your backup routine so future backups can be automated.

*Automated Disaster Recovery makes Backup Exec Desktop Pro the number one choice for protection of mission-critical data.*

**Advanced desktop data protection for small networks**

**Hardware/Software Requirements**

- Microsoft Windows 95, Windows 98, Windows Millennium, Windows NT Workstation 4.0 and Windows 2000 Professional
- 166 MHz Pentium or faster
- 32MB RAM
- Minimum 10MB hard disk space for installation
- Compatible backup device\*
