

# VERITAS MyCD Pro™

What can I do with VERITAS MyCD Pro? "Starter" screen provides quick options for creating CDs with Disc Copy, Audio CD, and Data CD.

## High performance CD recording every time

VERITAS MyCD Pro™ is the preferred CD recording software for the enthusiast who wants mastery over the CD writing process. Get exceptional control and performance with the purposeful recording implementation. By combining the features you need with the performance you require, MyCD Pro gets the job done the way you want it.

With VERITAS' CD recording solution you can burn your audio and data CDs using features that let you fully personalize the process of making a CD. MyCD Pro unites extensive options and a two-tier interface that addresses the needs of enthusiasts and professionals needing performance and fine-tuning capabilities.

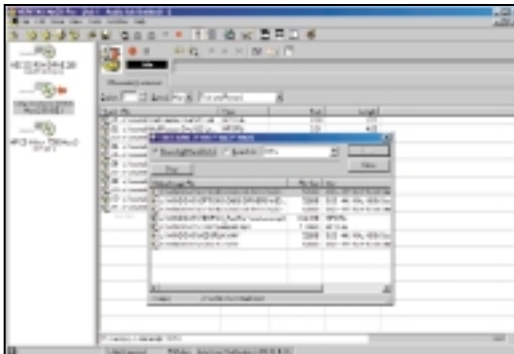

### What can I do with VERITAS MyCD Pro?

- Compile and record favorite music CDs for listening anywhere
- Archive data to CD for long-term removable media storage
- Save time creating audio CDs with "on the fly" file conversion
- Record digital images and pictures for optimum safekeeping
- Make exact copies of CDs for archival purposes
- Create multiple CDs with simultaneous recording

VERITAS MyCD Pro comes from the same company that created the award winning PC backup software, VERITAS Backup Exec Desktop™. Leveraging the company's extensive knowledge of PC data management and protection, VERITAS MyCD Pro extends this knowledge to bring you a proven solution for storing information on CD, thereby giving you control and performance in personalizing CD creation.

**Specifically created for anyone who wants consistent high performance with predictable results creating reliable music and data CDs**

- Automatically converts songs "on the fly" from .MP3, .WAV and .WMA while recording
- Intelligent design practically eliminates buffer underruns for error free CD recording and conservation of media
- Supports the latest 12x devices for high speed CD recording performance\*
- Create CDs of your favorite music collections and listen to them in any CD player or computer CD-ROM
- Supports both 650MB and 700MB CDs to give you flexibility in media choice
- Know what's on your audio CDs with title and artist text support (CD text)
- Disc-at-once recording leaves no gap between tracks on a music CD, thereby giving you the CD you want
- Created and supported by the world's largest independent data management software company

*Easily select and organize files to record an audio CD. The track finder will automatically find and list any valid audio files on your hard drive.*

**High performance CD recording every time**
