Music Label 2001 (v7.10) Readme

April 12, 2001

This document covers information that will help you install and use Music Label 2001. Please read this entire document.

To view this Readme file in Windows WordPad, maximize the WordPad window. To print this Readme file, open it in WordPad or another word processor, and then click Print on the File menu.

Installation

System Requirements

To use Music Label 2001, you need:
- 486/66 processor or higher (Pentium processor recommended)
- Windows 95, 98, ME, 2000 or NT4
- 16 MB of memory (32 MB recommended)
- 10 MB of available hard-disk space required
- Microsoft Mouse or compatible pointing device.

Special Notes and Known Problems for Installation
- At the end of an install or uninstall, you may be presented with a dialog prompting you to either restart Windows or exit setup. ALWAYS choose to restart Windows. Doing otherwise can result in an incomplete installation and make it difficult to re-install correctly.
- Music Label 2001 does not support Microsoft Windows NT 3.51.
- All tables will be replaced during install, so backup your current database.
- By using the Upgrade function the 3.x, 4.x, 5.x and 6.x databases will be upgraded to the latest format.

Uninstalling

Using the Add/Remove Programs icon in the Control Panel should uninstall Music Label 2001. Uninstalling by any other means (for example, by deleting directories or files) may cause system instabilities or problems for future installation of this product.

If you use "Add/Remove Programs" to remove Music Label 2001, you will have to restart Windows.

Online Help

The online Help file in Music Label 2001 contains reference information as well as step-by-step procedures. To discover the extent of the Music Label 2001 features, explore the online Help file.
