Description of Application:

Improve the performance of your Internet connection with WyvernWorks NetTweak Pro v3.42 an easy to use software tool that is specially engineered to optimize your Internet connection by up to 300% faster. This utility is attractive, easy to use and well suited for both beginner and advanced users. This product does not only boost normal dialup modem performance, but also local area network (LAN) connections, cable modem, integrated services digital network (ISDN), xDSL, Broadband, T1, T3 and other types of connections. It supports Windows 95,98,98SE,NT, 2000,Me and XP. It provides easy access to a handful of settings that improves your

Internet connection. These settings include MTU, RWin, TTL, NDI cache, and Black Hole Detect. You can easily tweak individual settings or select one of several presets based on your modem and connection type for better performance without having to upgrade your hardware. If you're unimpressed with the results of your modifications, you can easily restore the default settings. Other features include Security options, Modem options, AOL support, Registry backup, logging support and own IP detection.
