Introduction to Arrange Startup

Is your PC still starting up slowly?

Remember the day when you bought your new PC with Windows installed? It was lightning fast. It took only about ten seconds to boot. When you opened the Start menu or the load/save file dialogs, they showed up instantly. But, after a year of heavy use, you now realize that your PC has some serious performance issues. It takes more and more time to boot each time you start it. When you open your Start menu, file dialogs or other Windows Shell powered components, also seem to always need more time.

There is a simple and effective solution - Arrange Startup software! A lot of programs are loaded into the memory of your PC at startup, which noticeably lowers its performance. Some of the programs are system ones necessary for normal functioning, and the rest of them can be easily removed from the startup list. Arrange Startup classifies all of your programs that are executed at startup as system programs, suspicious applications that can be viruses and the programs that are not necessary for startup. It happens very often that the applications that can be executed when needed, form part of the startup list wasting hardware resources after each startup.

Arrange Startup will help you to remove programs from startup list or to add them there! Save your time! Use powerful and free utility right now!

Want more performance?

Try Smart PC software! Use Smart PC to detect, diagnose and repair all types of PC problems. Smart PC makes your PC faster, error-free and more efficient! Special features of the software ensure your personal privacy while surfing through the Web and protect your PC from information theft.

My Privacy

   My Privacy - is a software application intended for probing the confidential information stored on your computer on its vulnerability to unauthorized access by hackers. Perhaps, you have no idea that your computer may contain your private information which you have long forgotten about. These may include your credit card information, login names, passwords as well as cookie files tracking your Web surfing habits. The My Privacy software finds all personal information and suggests its unrestorable erasure. The software also evaluates the level of your privacy protection and proposes ways to maximize it. Please bear in mind that no antispyware will save your from information theft. You need to be aware of what and where sensitive information is stored on your computer and purge it on a regular basis thus making information theft useless.

   Look what kind of information My Privacy detects on your computer:

Typed URLs

   My Privacy shows Internet addresses which you typed in the address string of your computer
browser.

Internet Cookie files

   When your surf the Web an Internet site sends a cookie file which is stored on your computer. Such files contain information about your identify and preferences. By using My Privacy you can periodically remove the information stored in cookie files from your system, ensuring your privacy on the Internet.

Private Info

   My Privacy locates and classifies the following types of private data on your computer:

1. Private data of personal character
2. Login names, passwords
3. Financial information including credit card numbers
4. Other info

Upon retrieval of this information you can purge it all or delete selected parts. Then you can be sure that your data will not be a trophy for numerous hackers.

Visited Web-pages

   When you surf the web information from every website you visit is stored on your computer. Web browsers cannot provide full privacy as they do not clean up all hidden files containing data about your actions. My privacy will give you a hand to handle this.

Graphics

    The Temporary Internet files folder of your computer stores not only web-sites but its graphic part. Besides personal character of this information it also occupies much space on your hard drive and may build up with almost no limits. My Privacy will allow you to evaluate the volume of this information and discard unnecessary graphic files.

    My Privacy analyzes information stored on your computer and suggests handling of personal
data, e.g. login names, passwords, credit card numbers, Web surfing habits. If this
information becomes available to aliens your goodwill may be jeopardized. Entrust your
private life and business affairs to My Privacy and be sure in your invulnerability and
feel safe. Let My Privacy eliminate any traces of your in most remote corners of the
Internet. And do not forget about useful hints from My Privacy on building up safety of your
system.

    Our updated and improved edition of My Privacy runs on Windows 95/98/NT/2000/ME/XP/2003. This latest title has a free trial download available to the public at http://www.smartpctools.com

Document Trace Remover

   Document Trace Remover is an analytical tool for checking MS Office documents: Microsoft Word, Microsoft Excel, Microsoft PowerPoint for unauthorized private information disclosure. The software application inserts information about an initial name, (previous) authors, corporate name(s), number of saves and other built-in & custom properties, which can infringe your privacy. Document Trace Remover shall advise you of this information. Be professional in your office work and don't allow unauthorized disclosure of your private information!

   Document Trace Remover provides the following basic benefits:

Analyze document

   Microsoft Office documents default properties include some built-in ones, which contain a document title, author's name, template used and other custom properties.
   These properties can produce some hazard for your privacy since they contain rather detailed and comprehensive information on who, when and how many times edited a document as well as information about your corporation and (or) name of your computer.

Secure document

   With the help of Document Trace Remover you may replace or erase personal or business information from MS Office files, i.e. user name, initials, and company name. All you need is choosing a file or a folder and enter new variables, and Document Trace Remover shall do the rest. All preceding authors and other collateral information adjoined in editing a document will be deleted to ensure your security.

   Our updated and improved edition of Document Trace Remover runs on Windows 95/98/NT/2000/ME/XP. This latest title has a free trial download available to the public at http://www.smartpctools.com

Smart Data Recovery

   Smart Data Recovery is a data recovery tool for Windows operating
system that supports the FAT 12/16/32 and NTFS file system. The software
easily recovers data from hard disks, digital cameras, and any type of
storage media - flash drives, USB drives, memory stick, PC card,
multimedia card, secure digital card and diskette.

   Smart Data Recovery can recover any deleted files, including MS Office
files, photos, mp3 and zip files, even if the partition table is lost!

   The software enables to remove the data concerning deleted files. Thus
nobody will be able to recover the data deleted by you and use it in own
interest.

   Our updated and improved edition of Smart Data Recovery runs on Windows
NT/2000/ME/XP/2003. This latest title has a free trial download available
to the public at http://www.smartpctools.com
