

===== K-Ninja Read Me =====

K-Ninja v2.0.4

Key Features:

* **Based on K-Meleon v1.0.2 code.**

- Fully customized (minimalistic) interface, chrome and config files.
- **Rendering Engine: SeaMonkey v1.0.5 / Gecko v1.8.0.7**
- Optimal and unique speed settings pre-configured. Speed settings can now be “slowed down” for dial-up users via the menu option: **Tools -> Enable Fast Webpage Display.**
- Mozilla ActiveX Control support included for Media Player functionality on streaming and embedded multimedia content. To enable support, go to **Tools -> Applications -> ActiveX *Media Player* Control.** You will then need to restart K-Ninja for it to work.
- Mozilla extensions such as **Aggreg8 RSS Reader, Flashblock, & Quicknote** included.
- Extremely lightweight **STP MP3 Player v1.0.39.0** included (200kb). STP can be accessed via the Compact Menu: **Tools -> Applications -> STP MP3 Player**, or pressing **ALT + N** will run STP as well. When run an icon for STP will appear in your System Tray. Right click on the icon for options or to play an MP3 or CD whilst browsing.
- New Default Theme: **TheEternal v2.0.**
- URL Shortcut Hotkeys now implemented. Compact Menu: **Tools -> Hotkeys** to set the URLs for your hotkeys.
- Installer now automatically registers K-Ninja as the default web browser for your OS/system, and also inserts the required registry entries for installing plugins like Flash Player & Shockwave.
- Now includes additional Web Search engines including **MultiSearch**: enter a search term and the results will be delivered via 6 popular search engines including **Google (100 results per page via Scroogle), MSN, All The Web, Google Images, Ask.com & Gigablast.**
