AutoRun Design 2.0.0.10 (07/24/2005)
 - Change size of Application and AutoRun
AutoRun Design 2.0.0.9 (07/09/2005)
 - MButton Properties add (Margin and Spacing)
AutoRun Design 2.0 (01/20/2005)
   This is a professional and WYSIWYG production software with automatic CD/VCD running interface
and automatic running program.
   It has many functions, which can support a great variety of flash screen and insert picture,
sound, HTML, and RTF. There is a media player and RTF reader inside the software which when
starting up the interface, it can play the AVI file and display the RTF document. There are many
built-in templets in the software, and they can be called and revised as required. It is no
matter that you have never used this software, for the AutoRun will lead you to finish the
production of automatic running program step by step. If you possess such a software simple to
use, you will easily make a glary automatic playing CD in short time now.
