Step 2 AutoRunForm Properties (Form Properties, Splash, Background, Agreement and Security)

Form Properties
Caption, Icon, BorderStyle, BorderWidth, Position, Back Color, AlphaBlend, TransparentColor, Gradient Style, Gradient Color, Back Image, Back Image Style, Panel Border Bevel Inner, Panel Border Bevel Outer, Border, Panel BorderWidth, Panel BevelWhidth..

Splash
This allows you to select a graphic JPG, GIF or BMP to use as a splash screen when the user places the CD-ROM in the drive. A splash screen is a window containing your graphic, which displays for several seconds before disappearing and then launching your AutoRun Form (see above).
The splash screen window will auto-size to the size of your graphic and center itself on the screen or stretch to full screen, so choose a graphic with the size you would like the splash screen to be if not FullScreen style.

Background
Full screen background and logo image.

Agreement
You can display a license agreement before any files are launched. The user is required to accept the license in order to continue. If the user does not accept the license, then the AutoRun exits.

Security
You can protect your CD from being started by unlicensed users by requiring users to submit a User Name and Password or an Authentication Code.

Click 'AutoRunForm Properties' Button to configure the AutoRunForm Properties
