Macintosh PC Exchange 2.0

Features

Ease of use

- The easiest way to move files between a Macintosh and an IBM PC or compatible computer
- Fast, simple click and drag installation

Compatibility

- Works with leading Macintosh applications
- Automatically recognises floppy disks, SCSI hard disks and removable media formatted using the MS-DOS, Windows and OS/2
- Recognises MS-DOS formatted drive container files created by the MS-DOS Compatibility Card for Macintosh
- Formats 3.5 inch and 5.25 inch MS-DOS disks
- Formats PC compatible SCSI hard disk drives and removable media devices, such as Bernoulli and SyQuest cartridges and floptical disks
- Full System 7 compatibility
- A/UX compatible

Flexibility

- Handles MS-DOS, Windows and OS/2 data files just like Macintosh files, allowing you to open, copy, rename, delete and save documents and folders
- Allows you to open MS-DOS, Windows and OS/2 data files from compatible Macintosh applications
- Lets you configure your system to launch a compatible Macintosh application when you double click on an MS-DOS or Windows data file

Now you can move files back and forth between your Apple™ Macintosh™ personal computer and an IBM or compatible personal computer as easily as you can between two Macintosh systems.

Macintosh PC Exchange™ is a time saving software utility for those who work in a mixed platform environment or need to exchange data files with people who use MS-DOS® or Windows™ systems.

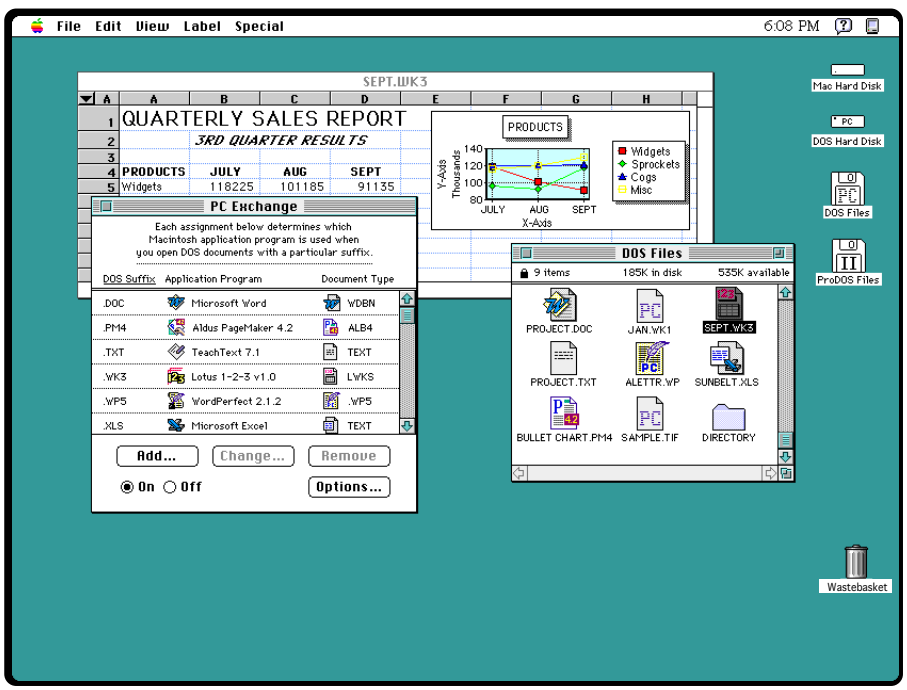
With Macintosh PC Exchange, you can work with other disks in the same way you do with Macintosh disks. Just insert an MS-DOS, Windows or OS/2 formatted disk into your Macintosh system; Macintosh PC Exchange immediately displays the disk's icon on your desktop. The disk's contents appear as documents and folders that you can open, save, rename, move, copy and delete — just like Macintosh files.

It's just as easy to move files from your Macintosh to an IBM compatible computer. Simply insert an MS-DOS formatted disk into your system — or let the Macintosh format one for you — and drag the files onto it. Then take the disk to a PC and begin working. It's that simple.

Now with Macintosh PC Exchange 2.0, in addition to floppy disks you can work with SCSI hard disks formatted under the MS-DOS, Windows or OS/2 operating system, as well as with floptical, Bernoulli and SyQuest removable media devices.

You can also customise Macintosh PC Exchange to automatically launch your favourite Macintosh applications when you double click on MS-DOS or Windows data files. For example, it can launch Lotus 1-2-3 for the Macintosh when you click on a file created using Lotus 1-2-3 for Windows.

Macintosh PC Exchange: it's never been this easy to work with MS-DOS data files on a Macintosh.

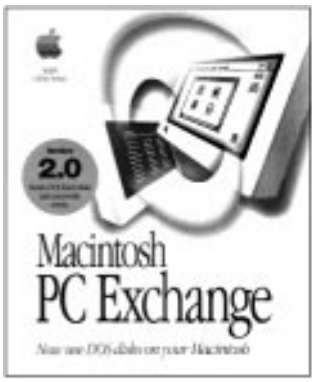


Macintosh PC Exchange 2.0

Ordering Information

Macintosh PC Exchange 2.0
Order No. M1252Z/B
- One 800K program disk
- User's guide

Macintosh PC Exchange 2.0 Upgrade Kit
Order No. M3377Z/A
For upgrading from Macintosh PC Exchange version 1.0 to version 2.0



Technical Specifications

Disk compatibility
- 720K or 1.44MB 3.5 inch MS-DOS disks
- 360K or 1.2MB 5.25 inch MS-DOS disks (requires a third party 5.25 inch floppy disk drive)
- PC compatible SCSI hard disks and removable media drives, such as Bernoulli and SyQuest cartridges and floptical disks

System requirements
- Apple Macintosh computer with at least 3MB of RAM
- System 7
- Hard disk drive
- Apple SuperDrive™ or compatible floppy disk drive
- Compatible 5.25 inch floppy disk drive (required only for 5.25 inch MS-DOS disks)
- Optional: SCSI hard disk or removable media drive

File compatibility

Files created with these MS-DOS or Windows applications	Can be read (and written back to MS-DOS or Windows format) by these Macintosh applications
MicrosoftWord	Microsoft Word 5.0, Microsoft Works 3.0, Claris MacWrite II 1.1v3 and Claris MacWrite Pro 1.0v4
WordPerfect	WordPerfect 2.1, Microsoft Word 5.0, Microsoft Works 3.0, Claris MacWrite II 1.1v3 and Claris MacWrite Pro 1.0v4
Lotus 1-2-3	Lotus 1-2-3 1.0, Microsoft Excel 4.0 and Claris Resolve 1.1v1
Microsoft Excel	Microsoft Excel 4.0, Lotus 1-2-3 1.0 and Claris Resolve 1.1v1
Aldus Persuasion	Aldus Persuasion Player 1.0*
Microsoft PowerPoint	Microsoft PowerPoint 3.0
Microsoft Works	Microsoft Works 3.0
Aldus PageMaker	Aldus PageMaker 4.2
Adobe Illustrator	Adobe Illustrator 3.2
dBASE II Plus, dBASE IV	FoxBASE+/Mac 2.0.1 and dBASE IV Runtime Plus*
Claris FileMaker Pro 2.0	Claris FileMaker Pro 2.0
Harvard Graphics	Deneba Canvas 3.0.5

**Reads MS-DOS and Windows files on the Macintosh. Does not write back to MS-DOS or Windows format.*

Note: This list is representative only; it does not include all possible combinations of compatible Macintosh and MS-DOS or Windows applications.
