▶ Image editing

▶ Text handling

▶ Presentation

▶ Drag-and-drop clip art

▶ File translators

Mac™OS

**MICROSOFT®
WINDOWS™
COMPATIBLE**

**RUNS ON
WINDOWS®95
AND
WINDOWS®3.1**

Finally, there's a graphics program that's powerful, yet amazingly easy to use – so you don't have to be a graphics professional to get the great looking results you want. ClarisDraw™ software's breadth of drawing, painting, image editing and text tools can bring to life any graphic you can visualise – from technical drawings and schematics to newsletters, posters and logos.
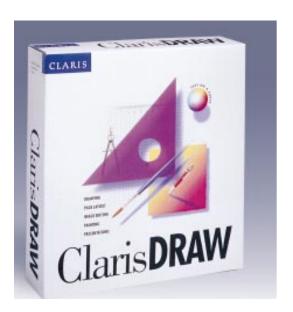

ClarisDraw has intelligent features that help you quickly produce sensational results. Its smart graphics tools automatically maintain alignment, size and connections between objects, even if you move or edit your drawing. The result is much faster editing and creation than with traditional graphics programs. Then there's its smart clip art libraries which put thousands of professionally-designed maps, figures and form elements, plus engineering, scientific and architectural art, at your fingertips. All you have to do is drag and drop an object onto the page.

With its wealth of tools and import/export capabilities, ClarisDraw is the perfect application for quickly editing clip art, charts, scanned images and digital photos created in other programs. Go ahead and add rotated text with a gradient or pattern, wrap text around any object, scale images precisely, or emboss objects for a three dimensional look. It's never been so easy.

Even better, the Macintosh and Windows versions of ClarisDraw are fully compatible – so you can share files across platforms without translation. It just doesn't get much easier.

Claris. *Simply powerful software.*™

*ClarisDraw –
Great graphics without the hassle.*

ClarisDraw
for Macintosh and Windows

The Versatility to Handle Any Task

Features	Benefits
Comprehensive Drawing Tools	Create professional-looking graphics with tools for lines, rectangles, ovals, arcs, customisable regular polygons, beziers, notes and more.
Floating Palettes	Quickly access 64 customisable fill patterns, 64 gradient fills, 256 colours and your choice of line patterns and widths using palettes you can place anywhere on screen.
SmartSymbol Library	Quickly produce compelling graphics with thousands of professionally-designed, high-resolution maps, figures, form elements and architectural art. Just drag and drop elements onto the page.
Colour Painting	Produce dazzling colour paint images using paintbrush, bucket, spray can and other tools.
Image Editing Effects	Edit paint objects and scanned images for stunning graphic effects using tint, darken, blend, distortion, shearing and perspective.
Text to Curve and Object Binding	Achieve dramatic visual results with text curved or bound to any object you specify.

Features	Benefits
Presentation Special Effects	Create and deliver eye-catching presentations using transition effects including fades, loops, automatic advance and master backgrounds.
Video Support	Give your presentations greater impact with Apple QuickTime and AVI video and sound clips.
Outlines	Add lists and bullet points to any drawing or presentation with built-in outlining.
Linked Text Frames	Speed the layout of flyers and signs by automatically flowing text across frames placed anywhere on the page.
Text Wrap	Wrap text automatically around any graphic shape to produce posters and brochures that get noticed.
Text Styles	Save frequently-used text styles with font, size and other settings you specify.

ClarisDraw. Great graphics have never be

The 'drag-and-drop' SmartSymbol library speeds your work, even automatically updating duplicated objects when you edit the original.

Smart drawing tools, like SmartAlign and SmartConnector, speed your work by maintaining relative object size, alignment and connections as objects are resized and moved.

Smart Tools take the Guesswork out of Drawing

| Features	Benefits
SmartSymbol Manager	Save time and effort using drag-and-drop objects from the included libraries or those you create. Cloned objects can be automatically updated when you change the original.
Shapes Palette	Instantly place arrows, symbols and other eye-grabbing objects of any size or direction anywhere in your drawing.
SmartSize	Automatically maintain the height and width of all specified objects, and instantly update all objects by resizing just one.
SmartAlign	Automatically maintain alignment and spacing (top, bottom, center, left or right) of graphic objects and text even as they are moved.
SmartConnector	Create straight or angled lines that stay permanently connected to objects, even when the objects are moved.
SmartShadows	Add depth to any object by applying customisable shadowing effects.
SmartEmbossing	Add a dazzling embossed or shadow effect to objects with a click of the mouse.

Precision Ensures the Highest Quality Results

| Features	Benefits
PointGuide and Guideliner	Instantly locate mid-points, end-points and object centres to ensure precision placement of lines and objects.
Direct Object Size Editing	View and edit object dimensions, length and angle of rotation for flawless drawing precision.
Precision at Any Scale	Ensure your drawings exactly match high-resolution printed output with precision zooming, object scaling and rotation, and accuracy of over 2300 dpi.
Flexible Document Configuration	Tackle even the most complex drawings with essentially unlimited layers and document sizes as large as 254cm by 254cm or even larger.

Full Compatibility for Seamless Graphics Exchange

Features	Benefits
Robust Graphics Import/Export	Exchange graphics with other users and Import/Export programs via industry standard graphics file formats.
Claris Graphics Engine	Maximise your graphics investment by sharing files directly with ClarisImpact software.
Cross-platform Transparency	Share files between Macintosh and Windows versions without translation.

easier to achieve.

Colour painting with customisable paintbrush, paint bucket, and spray can tools adds dazzling impact to your graphics.

Wrapping text quickly around graphics creates logos, emblems or graphic elements for dazzling newsletters and other promotional material.

ClarisDraw
for Macintosh and Windows

Turn to the versatile new standard for fast, flexible and precise graphics. Breakthrough graphics intelligence and integrated drawing, painting, image editing and presentation tools save you time and effort creating professional-quality signs, maps, diagrams, free-form drawings, brochures, flyers and much more.
