While FileMaker Pro 2.1 for Macintosh and FileMaker Pro 2.1 for Windows share the same graphical user interface, both versions have been optimised for their respective operating systems. That means Macintosh users can take full advantage of their Macintosh system, and PC users can take full advantage of their Windows interface. Plus, each version offers these unique features:

FileMaker Pro 2.1 for Macintosh.

With more than 50 new features, FileMaker Pro 2.1 for Macintosh gives you even more power for scripting, data management and computing across workgroups. Take full advantage of the expanded Apple System 7 capabilities with features like QuickTime, Apple events and Data Access Manager.

- Advanced, new scripting capabilities allow new and sophisticated users alike to design customised operations, including Apple events.
- System 7 Omniscient: Supports Apple events, provides host data access through Data Access Manager, incorporates expanded System 7 capabilities such as Balloon Help and TrueType.
- Multimedia Support: Integrate full multimedia graphics and sound into your database through QuickTime. Easily capture and play back high-quality sound within database records.
- External Script Control: Control data flow by having FileMaker Pro 2.1 open and execute scripts in a variety of other applications, including HyperCard, QuicKeys, Tempo II+ and more. Graphically represent data using FileMaker Pro 2.1's external script control and spreadsheets such as Microsoft Excel to create sophisticated charts and graphs.
- Advanced Data Handling Capabilities: Wildcard searches have been added to the search function. Users also now have the ability to reorder layouts and reserialise records.

Data File Formats Supported

- FileMaker Pro 2.1 for Windows
- FileMaker Pro
- Tab-Separated Text
- Comma-Separated Text
- SYLK
- DBF
- DIF
- WKS
- Merge
- Data Access Manager

Graphics File Formats Supported

- MacPaint
- PICT
- PICT2
- EPS
- TIFF
- Others via XTND filters, DataViz
- Graphic Translators (available separately)

FileMaker Pro 2.1 for Windows.

Designed to support many specific Windows features, FileMaker Pro for Windows is the ideal choice for new, as well as experienced Windows users.

- Multi-user data sharing utilises Windows Dynamic Link Libraries to support Novell NetWare, PhoneNET Talk, Microsoft LAN Manager, Microsoft Windows for Workgroups, Banyan VINES and Artisoft LANtastic networks.
- Data import capability from popular MS-DOS, Windows and Macintosh formats such as dBASE, Lotus 1-2-3 and more.
- Import graphics from Micrografx Designer, Harvard Graphics and more. Graphics filters conform to the Aldus PageMaker 3.0 standard.
- Support for TrueType, Bitstream Facelift and Adobe Type Manager (ATM) fonts.
- Use sound input with Windows 3.1 and a Windows-supported sound card such as Creative Labs' Sound Blaster.
- DDE (Dynamic Data Exchange) support - access and control popular windows applications from within FileMaker Pro 2.1.
- QuickTime for Windows support - add sights and sounds to your FileMaker Pro databases.
- Send e-mail from Microsoft Mail or Lotus cc:Mail from within FileMaker Pro 2.1.
- FileMaker Pro Translator, a new utility that allows owners of Symantec's MS-DOS-based Q & A 4.0 database program to easily transfer their database to FileMaker Pro 2.0 for Windows.
