Laser Point
P.O. Box 2378
Watsonville, CA 95077

Dear Susan,

Please find enclosed the signed contract, two software disk containing all necessary materials for distribution and Giffs.

The following page is a brief promotional description of the product. This description can also be used as the information needed for page 11 of the contract.

"Try this revolutionary Idea for sending greetings to your loved ones and friends. EG-Cards™ (Electronic Greeting Cards™) are small applications that allow users to personalize names, text, poems and include their own recorded message into a multimedia presentation that is guaranteed to amaze and amuse the recipient! The cards are purely electronic, no printing is necessary. Each card consists of four pages of fun and excitement including an animated presentation page, a poem or wise saying page, a text or letter page and a good-bye page. There is also a splash screen for easy navigation and a detailed settings page that allows the user to enter names, titles, a personalized voice message or sound and even a personalized poem, if so desired.   The settings page and splash screen will be hid before sending the E-Card. Once the card has been personalized, it can be sent via disk through the mail or up-loaded as an attached file to someone's electronic (BBS) mailbox. The EG-Cards vary in size from 80K to 125k before compression. Ideal for up-loading to BBSs. **They require system 7 or higher, and run on both color and black and white machines. A microphone is necessary to change the prerecorded voice message.** This first commercial disk, EG-Cards™ 95 Vol. 1, consists of 12 EG-Cards: Valentine B, Happy Anniversary A, Happy Mother's Day A, Happy Graduation A, You're Invited A, Have a Great Day A, Happy Father's

Day A, Happy Birthday A & B, Merry Christmas B & P and Cyber Cheer A. The EG-Cards are set to use 300k RAM but for the most part do not use more than 150k RAM. The EG-Cards™ can be used indefinitely.   Disk are in High Density format. Send e-mail inquiry to orders@laserpoint.com."

"**FreeRam1.3.3** is an application that displays the current free ram in a cell sized window that can be positioned anywhere on the screen with the added advantage of remembering that location the next time FreeRam1.3.3 is opened! FreeRam1.3.3 also allows the user to calibrate the free ram displayed so that it reflects exactly the same figure that is found in the "About This Macintosh…" window!! FreeRam1.3.3 allows the user to set the window and the "free ram number" to several different colors!!! FreeRam1.3.3 automatically puts itself in the background!!!! Just drop it in your StartUp folder. Requires Macintosh OS system 7 or above. What are you waiting for?   Download it now! Contact Laser Point to purchase the registered version of FreeRam1.3.3LP, plus receive a Free Happy Birthday 2.5LP EG-Card. $10.00 fee plus 83¢ tax for California residents. Registration info is included in the ReadMe file."
